SECTION II – RISK FACTORS

This offering and an investment in equity shares involve a high degree of risk. This section describes the risks that we currently believe may materially affect our business and operations. You should carefully consider the following, in addition to any forward-looking statements and the cautionary statements in this Letter of Offer and the other information contained in this Letter of Offer, before making any investment decision relating to the Rights Equity Shares. Prospective investors should read this section in conjunction with the sections ‘Our Business’, ‘Forward Looking Statements’, ‘Financial Statements’ and ‘Management’s Discussion and Analysis of Financial Condition and Results of Operations’, as well as other financial and statistical information contained in this Letter of Offer. The occurrence of any of the following events, or the occurrence of other risks that are not currently known or are now deemed immaterial, could cause our business, results of operations, cash flows, financial condition and prospects to suffer and could cause the market price of our Equity Shares to decline or fall significantly and you may lose all or part of your investment.

This Letter of Offer also contains forward-looking statements that involve risks, estimates, assumptions and uncertainties. Our actual results may differ materially from the anticipated results in the forward-looking statements as a consequence of certain factors including the considerations described below and elsewhere in this Letter of Offer.

The risks described below are not the only ones relevant to us or the Equity Shares. Additional risks that may be unknown to us and some risks that we do not currently believe to be material could subsequently turn out to be material. Although we seek to mitigate or minimize these risks, one or more of a combination of these risks could materially and adversely impact our business, financial condition and results of operations. Investors should pay particular attention to the fact that our Company is an Indian company and is subject to a legal and regulatory regime which in some respects may be different from that applicable in other countries. Prospective investors should consult their own tax, financial and legal advisors about the particular consequences of an investment in the Issue.

Unless otherwise indicated, all industry and market data used in this section has been derived from the ICRA Report. None of our Company, the Lead Manager or any other person connected with the Issue has independently verified such information. Unless otherwise indicated, all financial, operational, industry and other related information derived from the ICRA Report and included herein with respect to any particular year refers to such information for the relevant calendar year.

All financial information used in this section is derived from the Financial Statements. For additional details, please refer to the section titled “Financial Statements” beginning on page 72.

Considerations relating to our Company and its Business

1. Our investments are focused on the automotive sector and any adverse developments in the automotive and transportation industry would adversely affect our results of operations.

Our investments are focussed primarily on the automotive sector with 15 of our 20 portfolio companies engaged in the automotive sector. For the nine month period ended December 31, 2020 and Fiscal 2020, 0.44% and 72.86% of our revenue from operations from investments was contributed by portfolio companies engaged in the automotive sector. As we focus on investments in the automotive sector, developments in the automotive and transportation industry have, and will likely continue in the future to have, a disproportionate impact on our investments. As per ICRA, the COVID-19 induced country-wide lockdown, caused factories to close and dealerships to shut, leading to complete loss of sales for the OEMs in April 2020 – a first in the history for the industry. While the operations of OEMs resumed in May-2020, the unabated rise in Covid-19 infections in the unlock phase have resulted in localized re-imposition of lockdowns in several states. This again impacted the domestic supply chains and interrupted the pace of overall economic recovery. (Source: ICRA Report)

Our business is, therefore, entirely dependent on various factors that impact this sector such as the demand for automobiles or transportation services in India, changes in Indian regulations and policies affecting vehicles, natural disasters and calamities as well as the Indian and global macroeconomic environment. For example, according to

ICRA, the scrappage policy has the potential to drive some replacement demand in the commercial vehicle sector when implemented. However, the extent of such benefit would remain dependent on the form and quantum of incentives offered under the scheme (*Source: ICRA Report*). Such factors may result in a decline in the sales or value of certain kinds of vehicles, which in turn may adversely affect the financial condition, the results of operations and/or cash flows of our portfolio companies. The enforcement of such scrappage policy may result in a decline in the sale of the products by our portfolio companies which would further, impair our investment and require us to write down our investments or may impact our ability to receive dividend income from our portfolio companies.

Our business, to a large extent, depends on the continued growth in the automobile and transportation industry in India, which is influenced by a number of extraneous factors which are beyond our control, inter-alia including (a) the macroeconomic environment in India, (b) the demand for transportation services, (c) natural disasters and calamities, and (d) changes in regulations and policies in connection with motor vehicles as well as the automotive industry.

Our investments are not diversified and any factor which adversely impacts the automotive and transportation industry may have a disproportionate impact on our operations, profitability and/or cash flows.

2. We depend on a limited number of portfolio companies for a significant portion of our revenues. Any significant reduction in production and sales of, or demand for the products of such portfolio companies may adversely affect our business, results of operations and financial condition.

We depend on a limited number of portfolio companies for a significant portion of our revenues. Our top 5 portfolio companies represented 71.12% and 58.63% of our revenue from operations from investments and 24.38% and 22.31% of our total revenue from operations for Fiscal 2020 and Fiscal 2019, respectively.

It is difficult to forecast the success or sustainability of any strategies undertaken by any of our key portfolio companies in response to the current economic or industry environment. Unfavourable industry conditions can also result in an increase in commercial disputes and other risks of supply disruption. A sustained decline in the demand for products produced by our portfolio companies could prompt them to cut their production volumes, directly affecting the demand from customers for their products. In addition to decline in demand for existing products, insufficient demand for new products launched by our portfolio companies may also affect demand for their products from customers. Further, the volume and timing of sales to end customers may vary due to variation in demand for our portfolio companies' products, their attempts to manage their inventory, design changes, changes in their product mix, manufacturing strategy and growth strategy, and macroeconomic factors affecting the economy in general, and our portfolio companies in particular.

Our growth depends on the growth of our portfolio companies. If our key portfolio companies do not successfully enter into new high-growth segments, we may be prevented from capitalising on new growth opportunities. Since we are significantly dependent on certain key portfolio companies for a significant portion of our revenues, the loss of any one of our key portfolio companies or any adverse change in the financial condition of any of these portfolio companies, could have an adverse effect on our business, results of operations and financial condition. We may continue to remain dependent upon our key portfolio companies for a substantial portion of our revenues.

3. The acquisition of additional shareholding in Brakes India Private Limited from the Issue Proceeds is subject to completion of conditions precedent under the Share Purchase Agreement. However, we may not be able to complete such acquisition in a timely manner and such acquisition may not prove to be profitable or achieve the profitability that justifies our investment, which may adversely impact our prospects, growth and results of operations.

The objects of the Issue are to acquire additional shareholding of 7.71% in BIPL from ZF, for an aggregate consideration of ₹ 34,999.97 lakhs. We have entered into the Share Purchase Agreement for the acquisition of the abovementioned additional shareholding. The completion of the transaction contemplated under the Share Purchase Agreement is subject to the completion of certain conditions precedent, including receipt of an unconditional approval from CCI or implementation of any mandatory conditions / observations set out in the approval from CCI. There is no guarantee that CCI approval will be granted or that any conditions imposed by CCI will be met in a timely manner

or at all. Failure to obtain CCI approval or failure to satisfy any or all of these conditions may result in the non-completion of the acquisition of additional shareholding in BIPL.

Additionally, once the acquisition is completed, we cannot assure you that the acquisition will prove to be profitable or would enable us to achieve profitability which justifies the investment. The foregoing may have an adverse impact on our prospects, growth and results of operations.

4. *The acquisition of additional shareholding in BIPL from ZF by us is one among several transactions for acquisition of up to 49.00% of BIPL held by ZF. In the event of non-completion of the remaining acquisitions by other purchasing parties, our acquisition of 7.71% of BIPL may be rendered infructuous.*

Our acquisition of 7.71% of BIPL from ZF, is one among several transactions where we along with other purchasing parties have agreed to acquire the entire 49.00% shareholding in BIPL held by ZF. The transactions for acquisition of the remaining 41.29% of the shareholding in BIPL by other purchasing parties are not in our control and, like our acquisition of 7.71%, will be subject to receipt of necessary corporate approvals, financing and regulatory and other permissions as may be required by the respective parties to such acquisitions. We cannot guarantee that any of the transactions for the acquisition of the remaining 41.29% shareholding in BIPL by the other purchasing parties will be completed in a timely manner or at all.

Further, in the event of a failure by other purchasing parties to consummate these transactions or termination of the share purchase agreement with the other purchasing parties, the Share Purchase Agreement shall also automatically stand terminated.

5. *Differing interests of our partners or the management of our portfolio companies or the management of our Promoter may result in unfavourable outcomes for us, which could have an adverse effect on our business and results of operations.*

We will continue to pursue strategic alliances and investments in the future. The success of our business collaborations and investments depends significantly on the satisfactory performance by our counterparties of their respective contractual and other obligations. As we do not control our partners or the management in our portfolio companies, we face the risk that they may not perform their obligations. Further, we do not usually undertake management obligations in respect of any of our portfolio companies, and are dependent on the management of the respective portfolio companies for the daily operations and management of such portfolio companies. If our partners or the management of the respective portfolio companies fail to perform their obligations satisfactorily, we may be unable to successfully carry out our goals, including receiving any value from our investments.

In such a circumstance, we may be required to make additional investments or become liable for our partner's obligations, which could result in reduced profits or, in some cases, significant losses. Our collaborations may face difficulties in their operations due to a variety of circumstances, which could have an adverse effect on our business, results of operations and financial condition. If the interests of our partner or those of the management of the respective portfolio companies conflict with our interests, this, and other factors may cause our counterparties to act in a manner that is contrary to our interests, or otherwise be unwilling to fulfil their obligations under our arrangements with them.

In addition, for our shared services business, we are dependent on our Promoter for daily operations and management. If our Promoter is unable to provide assistance or fail to perform its obligation, we may be unable to carry out our shared services business efficiently.

Further, we have limited experience in management of our portfolio companies. In the event that we are required to undertake obligations of our partners, there can be no assurances that we will be able to fulfill such obligations in a timely manner or at all or that such obligations will not require our management to devote substantial time and monetary resources. Further, if any of our portfolio companies are acquired by any other company, its management may change which in turn may affect our relationship with such portfolio company. Any of the foregoing could have an adverse effect on our business, results of operations, financial condition, and reputation.

6. Any failure by us to identify, manage, complete and integrate acquisitions, divestitures and other significant transactions successfully could adversely affect our results of operations, business prospects and/or cash flows.

As part of our business strategy, we may acquire or invest in companies or businesses, enter into strategic alliances and joint ventures, divest non-core businesses or assets, sell or dispose of any unit(s) or division(s), and make investments/disinvestments to further our business or any other restructuring. In order to pursue this strategy successfully, we must identify suitable entities for successfully completing such transactions, some of which may be large and complex, and manage the integration of acquired companies or employees. We may not fully realise all of the anticipated benefits of any such transaction within the anticipated timeframe or at all. Any increased or unexpected costs, unanticipated delays or failure to achieve contractual obligations could make such transactions less profitable or unprofitable. Managing business combination(s) and investment transactions requires varying levels of management resources, which may divert our attention from other business operations, and may result in significant costs and expenses and charges to earnings. The challenges involved in integration include:

- combining product offerings for different portfolio companies and entering into new markets in which we are not experienced;
- consolidating and maintaining relationships with customers of such portfolio companies;
- consolidating and rationalising transaction processes and corporate and information technology infrastructure;
- integrating employees and managing employee issues;
- coordinating and combining administrative and other operations and relationships with third parties in accordance with applicable laws and other obligations while maintaining adequate standards, controls and procedures;
- achieving savings from infrastructure integration; and
- managing other business, infrastructure and operational integration issues.

Accordingly, a failure to identify, manage, complete and integrate acquisitions, divestitures and other significant transactions successfully could adversely affect our results of operations, business prospects and/or cash flows.

7. We had applied for registration as a non-deposit taking non-banking finance company. In the event of not receiving the registration, our ability to carry on investment activities may be restricted.

Till Fiscal 2020, we were an exempted CIC, not requiring registration with RBI. However, due to decrease in market price of shares and corresponding decrease in value of investments in accordance with accounting norms, the value of certain of our investments has been altered, leading to us no longer meeting the criteria for being categorised as a CIC. We had thereafter, applied for registration as a non-deposit taking Non-Banking Finance Company (“NBFC-ND”). Our application was returned by RBI vide their letter dated February 25, 2021, post which we sought a clarification from RBI by way of our letter dated February 26, 2021.

In the event of non-receipt of registration as an NBFC-ND from the RBI, in a timely manner or at all, we will, subject to meeting the requisite criteria, once again be categorised as an exempted CIC and our ability to invest in non-group entities would be restricted. Inability to receive registration as an NBFC-ND may accordingly restrict our ability to diversify our investment portfolio.

8. The impact of the COVID-19 pandemic on our business and operations is uncertain and the extent to which it may continue to affect our business and operations in the future cannot be predicted.

Due to the emergence of the coronavirus disease 2019 (“COVID-19”), declared a pandemic by the World Health Organization, the Government of India had introduced stringent measures to prevent the spread of the disease. As on the date hereof, certain restrictions imposed by the GoI, such as on maintenance of social distancing, have not been completely lifted. As the viral pandemic has not yet fully subsided, there is little comprehension on the full impact of the pandemic induced lockdown on the Indian or the global economy. While the GoI has, through the Ministry of Finance, issued a series of liquidity enhancement measures to counteract the slowdown caused by a reduction in economic activity during the lockdown, the impact of such measures remains unknown at the present moment.

Some of the ascertainable impact of COVID-19 pandemic and the pandemic induced lockdown on the business and operations of our portfolio companies and consequently on our prospects, include:

- Adverse impact on the business of our portfolio companies and their customers, which in turn has adversely impacted our business prospects;
- Adverse liquidity on account of an RBI mandated moratorium, which in turn will also lead to decrease in overall auto sales and repayments; and
- Reduction of employee headcount or employee costs and other cost optimization measures.

While our Company was operational during the lockdown in accordance with the guidelines issued by the Ministry of Home Affairs and the concerned State Government, from time to time, there can be no assurance that even with easing of the pandemic containment measures, economic activity in general or the level of business enjoyed by our Company or our portfolio companies in the past will continue to exist.

The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will significantly depend on future developments, including the timeliness and effectiveness of actions taken or not taken to contain and mitigate the effects of COVID-19 both in India and internationally by governments, central banks, healthcare providers, health system participants, other businesses and individuals, which are highly uncertain and cannot be predicted.

Additionally, as we gradually transition towards pre-pandemic levels of office attendance for our employees, sanitisation and precautionary measures undertaken may cause our Company to incur additional expenses to maintain the health of employees, including operating with limited staff or at limited times, which in turn will impact our business and results of operations. Further, if any of our employees contract COVID-19 and are unable to continue working, we may be compelled to undertake additional measures including temporary suspension of operations at a particular office, which in turn will impact our business and results of operations.

The negative impact of the COVID-19 pandemic is expected to be reflected in the turnover and profitability of our Company for Fiscal 2021. Our revenue from operations decreased by 28.13% from ₹ 5,702.65 lakhs in the nine month period ended December 31, 2019 to ₹ 4,098.34 lakhs in the nine month period ended December 31, 2020, which was primarily on account of reduction in dividend income from portfolio companies.

Due to the limited information available currently, we have not been able to quantify the full impact of the containment measures on our financial statements. In the event that the containment measures have a significant adverse impact on the economic health of our customers in particular and the economy in general, our future prospects, profitability and results of operations may in turn be negatively impacted.

9. We may face difficulties in executing our strategies including our expansion plans, and there can be no assurance that our investments will result in growth and/or additional profitability for our Company.

In recent years, we have experienced significant growth. Our growth strategy includes capitalising on opportunities in the automotive space, strategically expanding our portfolio in segments which are more value accretive and diversifying our investment portfolio to non-automotive sectors. We cannot assure you that our growth strategies will be successful in a timely manner or at all or that we will be able to continue to expand further or diversify our investment portfolio.

We may not be able to sustain our rates of growth, due to a variety of reasons including a decline in the demand for products and services in the automotive industry as a whole or of those of any of our portfolio companies in particular, increased price competition, non-availability of raw materials, lack of management availability or a general slowdown in the economy. A failure to sustain our growth may have an adverse effect on our business, results of operations and financial condition.

Our growth strategy will place significant demands on our management as well as our financial, accounting and operating systems. If we are unable to execute our operations efficiently, we may not be able to successfully execute

our growth strategy. Further, as we scale-up and diversify our operations, we may not be able to execute our operations efficiently, which may result in delays, increased costs and lower profitability. We cannot assure you that our future performance or growth strategy will be successful. In addition, any of our current or future acquisition related strategies may not be executed as planned on account of factors such as lack of adequate experience, increase in competition from peers, amongst others. Further, expansion and acquisitions may require us to incur or assume new debt, expose us to future funding obligations or integration risks and we cannot assure you that such expansion or acquisition will contribute to our profitability. Our failure to manage our growth effectively may have an adverse effect on our business, results of operations and financial condition.

10. Our failure to identify and understand evolving industry trends in the industries in which we or our portfolio companies operate and changes in customer preferences may cause us to incur losses.

As on date, we primarily derive income from our 20 portfolio companies and from providing support services. We expect to continue to dedicate significant financial and other resources towards identification, development and acquisition of potential portfolio companies and retention of existing clients and seeking new clients in our support services vertical. Identification of appropriate acquisition targets or maintenance of client relationships is expensive and time consuming, and there is no assurance that such activities will result in significant new investments or marketable services, cost savings, revenues or other expected benefits. If we spend significant time and effort on research and are unable to generate an adequate return on our investment, our business and results of operations may be materially and adversely affected.

Further, changes in consumer preferences, regulatory or industry requirements or in competitive technologies may render certain of the services or products offered by our portfolio companies obsolete or less attractive. Our ability to anticipate changes in technology and regulatory standards and to successfully develop and introduce new and enhanced services or acquire technologies, partners or companies on a timely basis is a significant factor in our ability to remain competitive. However, there can be no assurance that we will be able to develop or secure the necessary technological or industry knowledge that will allow us to develop our investment portfolio or support services portfolio in this manner. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and results of operations may be adversely affected. Moreover, we cannot assure you that we will be able to achieve the technological advancements that may be necessary for us to remain competitive or that certain of our services will not become obsolete.

Our portfolio companies are also subject to the risks generally associated with new product introductions and applications, including lack of market acceptance, delays in product development and failure of products to operate properly. For instance, product development by our portfolio companies to meet the BS VI emission norms may not be accepted by end customers.

To compete effectively in the support services vertical, we must be able to develop and produce new services to meet our customers' demand in a timely manner. We cannot assure you that we will be able to provide such support or services to our customers in a timely manner or at all. As a result, we may incur and have in the past incurred capital expenditures to develop products or services to meet customer demands and those demands may be delayed at the customer end due to delays in product launches, which in turn, could materially adversely affect our prospects and results of operations.

In addition, sales of automotive components are directly related to the production and sales of automobiles, particularly in the passenger vehicle segment, which are impacted by general economic or industry conditions, including seasonal trends in the automobile manufacturing sector, volatile fuel prices, rising employee expenses and challenges in maintaining amicable labour relations as well as evolving regulatory requirements, government initiatives, trade agreements and other factors. For example, according to ICRA, the domestic PV industry volume were significantly impacted during Q1FY2021 due to lockdown restrictions (*Source: ICRA Report*). Any economic downturn in the automobile manufacturing and sales would result in a reduction in demand for the products manufactured by our portfolio companies, which may, in turn, significantly affect our revenues.

11. Inability to assess, monitor and manage risks inherent in our business and respond to technological and

sectoral changes may adversely impact our results of operations and profitability.

We are exposed to a variety of risks, including liquidity risk, interest rate risk, credit risk, operational risk and regulatory risks. The effectiveness of our risk management is limited by the quality and timeliness of available data.

Our hedging strategies and other risk management techniques may not be fully effective in mitigating our risks in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Some methods of managing risks are based upon observed historical market or industry behaviour. As a result, these methods may not predict future risk exposures, which could be greater than the historical measures indicated. Other risk management methods depend upon an evaluation of information regarding markets, customers or other matters. This information may not in all cases be accurate, complete, current or properly evaluated. Management of operational, legal or regulatory risk requires, among other things, policies and procedures to properly record and verify a number of transactions and events. Although we have established these policies and procedures, they may not be fully effective.

We have devoted significant resources to developing our risk management policies and procedures and expect to continue to do so in the future. Despite this, our policies and procedures may not be fully effective in identifying, monitoring and managing. As we seek to expand the scope of our operations, we also face the risk of inability to develop risk management policies and procedures that are properly designed for those new business areas in a timely manner. Implementation and monitoring may prove particularly challenging with respect to businesses that we have recently invested in. Inability to develop and implement effective risk management policies may adversely affect our business, prospects, financial condition and results of operations.

Our future success will depend, in part, on our ability to respond to new technological advances and evolving NBFC, automotive and finance sector standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. Failure to adapt to new technologies and sectoral preferences in a timely manner or at all, may adversely impact our profitability and results of operations.

12. We are subject to supervision and regulation by regulatory authorities in India, and changes in regulations governing us could adversely affect our business.

We are subject to the corporate, taxation and other laws in effect in India. The regulatory and legal framework governing us may continue to change as India's economy and commercial and financial markets evolve. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency in India's non-banking finance sector.

The laws and regulations governing the banking and financial services industry in India have become increasingly complex and cover a wide variety of issues, such as interest rates, liquidity, securitisation, investments, money laundering and privacy. In some cases, there are overlapping regulations and enforcement authorities. Moreover, these laws and regulations can be amended, supplemented or changed at any time such that we may be required to restructure our activities and incur additional expenses to comply with such laws and regulations, which could materially and adversely affect our business and our financial performance.

Compliance with many of the regulations applicable to our operations in India, including any restrictions on investments and other activities currently being carried out by our Company, involves a number of risks, particularly in areas where applicable regulations may be subject to varying interpretations. Further, compliance with many of the regulations applicable to our operations may involve significant costs and otherwise may impose restrictions on our operations. There can be no assurance that the laws governing our Company and its operations will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not adversely affect our business and future financial performance.

Additionally, we are required to make various filings with Registrar of Companies and other relevant regulatory or statutory authorities pursuant to the provisions of the Companies Act and other regulations. In addition, we are also

required to comply with the directives, regulations and guidelines issued by other regulators for listed companies, including stock exchanges and SEBI. If we fail to comply with these requirements, or a regulator claims we have not complied with these requirements, we may be subject to penalties and compounding proceedings. Imposition of any penalty or adverse findings by such authorities may have an adverse effect on our business, operations results, financial condition and reputation.

13. Any adverse impact on the ‘Sundaram Finance’ brand may have an impact on the benefits accruing to us from the use of the brand resulting in an adverse impact on our business and results of operations.

We benefit from our relationship with the ‘Sundaram Finance’ group in many ways, including such as reputation and experience. We believe that the ‘Sundaram Finance’ brand is perceived to be that of a trusted provider of quality products and services. Our growth and future success are influenced, in part, by our continued relationship with the ‘Sundaram Finance’ group. Many factors, some of which are beyond our control, are important -for maintaining and enhancing our brand image. A public perception that we do not provide satisfactory services, whether factually incorrect or based on isolated incidents, could damage our reputation, undermine the trust and credibility we have established for our stakeholders, including investors, lenders, customers and have a negative impact on our ability to attract new consumers or retain our current consumers. If we cease to benefit from these relationships for any reason, our business and growth prospects may decline, and our business and results of operations may be adversely affected.

We cannot assure you that the established ‘Sundaram Finance’ brand name will not be adversely affected in the future by events such as actions that are beyond our control, including customer complaints and dissatisfaction or adverse publicity from any other source. Negative public opinion about the financial services industry generally or about the ‘Sundaram Finance’ brand name, if not immediately and sufficiently remedied, can have an adverse effect on our business and results of operations.

14. We derive substantial income from our customers within a few geographies. Therefore, factors that adversely affect the demand for support services in such geographies may adversely affect our business.

We have in the past derived, and believe that we will continue to derive, a significant portion of our income from our customers within India and Australia. In addition, almost all of our employees are based in India. Consequently, factors that adversely affect the economies of India or Australia or the demand for support services within such jurisdictions, may adversely affect our business and profitability. We are, therefore, less insulated from the risk of adverse changes in market conditions as compared to other companies providing shared services who have significant operations across geographies.

15. The economic environment, pricing pressure and decreased employee utilisation rates have in the past, and may in the future, adversely impact spending on support services and therefore our income and operating results.

Spending on technology products and services is subject to fluctuations depending on many factors, including the economic environment in the markets in which our customers operate. Reductions in spending on support services, increased credit risk and extended credit terms arising from or related to the global economic slowdown have in the past adversely impacted, and may in the future adversely impact, our income, gross profits, operating margins and results of operations. When economic conditions weaken, our customers tend to reduce or postpone their spending on support services significantly which, in turn, lowers the demand for our shared services solutions and adversely affects our income and profitability. As a way of dealing with a challenging economic environment, customers tend to change their support services strategy by performing more work in-house or replacing their existing software with packaged software supported by the licensor.

Reduced spending on shared services in response to the challenging economic environment has also led to increased pricing pressure from our customers, which has led us to increasingly lower fixed price terms to our customers. Weak economic conditions in the future may also adversely impact our income, gross profits, operating margins and results of operations.

In addition to seeking lower fixed price terms rates, many of our customers may seek extensions in credit terms from the standard terms that we provide. Such extended credit terms may reduce our income, or result in the delay of the realisation of income, and may adversely affect our cash flows. In addition, extended credit terms also increase our exposure to customer-specific credit risks.

Moreover, our ability to maintain or increase pricing is restricted as customers often expect that as we do more business with them, they will receive volume discounts or special pricing incentives. Existing and new customers are also increasingly using third-party consultants with broad market knowledge to assist them in negotiating contractual terms. In addition, due to the growing demand for support services professionals in India, we may have to increase the levels of employee compensation in order to retain our employees and remain competitive in the employment market. Any inability to maintain or increase pricing on this account may also adversely impact our income, gross profits, operating margins and results of operations.

In addition, reduced or delayed spending on support services may adversely impact our utilisation rates for technology professionals. In addition to the business challenges and margin pressure resulting from the global economic slowdown and the response of our customers to such slowdown, there is also a growing trend among consumers of support services solutions towards consolidation of technology service providers in order to improve efficiency and reduce costs. A decrease in employee utilisation rate may have an adverse impact on our profitability in the future, whether on account of reduced or delayed spending on support services, particularly if accompanied by pricing pressure, and may also adversely impact our results of operations.

Our success in the competitive bidding process for new consolidation projects or in retaining existing projects is dependent on our ability to fulfil customer expectations relating to staffing, absorption of transition costs, deferment of billing and more stringent service levels. Our failure to meet a customer's expectations in such consolidation projects may adversely impact our business, income and operating margins. In addition, even if we are successful in securing the mandates for such consolidation projects, we may experience significant pressure on our operating margins as a result of the competitive bidding process.

16. The support services market is highly competitive, and our competitors may have advantages that may allow them to compete more effectively than we do to secure customer contracts.

The support services market in which we operate includes a large number of participants, and we have faced, and expect to continue to face, intense competition from providers of IT solutions both within and outside India. We believe that the principal competitive factors in our markets are breadth and depth of service offerings, reputation and track record, ability to tailor service offerings to customer needs, industry expertise, service quality, price, scalability of infrastructure, financial stability and sales and marketing skills.

To obtain engagements for our support service offerings, we are also competing with large, well-established global IT solutions companies as well as other India-based IT solutions companies resulting in increased competition and marketing costs. We also occasionally compete with in-house IT departments, vertically-focused IT service providers and local IT service providers based in the geographic areas where we compete.

Many of our competitors are significantly larger and some may have gained access to public and private capital or may have merged or consolidated with better capitalised partners, which has created, and may in the future create, larger and better capitalised competitors. These competitors may have superior abilities to compete for market share and for existing and prospective customers. Our competitors may be better able to use significant economic incentives, such as lower fixed price terms, to secure contracts with our existing and prospective customers. These competitors may also be better able to compete for and retain skilled professionals by offering them more attractive compensation or other incentives. These factors may provide these competitors with advantages over us to meet customer demands in an engagement for large numbers and varied types of resources with specific experience or skill-sets that we may not have available in the short or long-term. We cannot assure that we can maintain or enhance our competitive position against current and future competitors. Our failure to compete effectively could have a material adverse effect on our business, financial condition and results of operations.

17. System failures or inadequacy and security breaches in computer systems may adversely affect our business or reputation.

We utilize information technology systems to support our business processes which may be susceptible and vulnerable to damage or interruption from:

- events beyond our control, such as war, terrorist attacks and *force majeure* events, including earthquakes, tornados, hurricanes, fires or floods or break-ins
- power losses, computer systems failures, internet and telecommunications or data network failures, service provider negligence, improper operation by or supervision of employees, user error, physical and electronic losses of data and similar events; and
- computer viruses, cyber-attacks, penetration by individuals seeking to disrupt operations or misappropriate information and other breaches of security.

Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Any accidental security breaches or other unauthorized access to confidential information could expose us to liability related to the loss of the information, legal proceedings and negative publicity. While there have been no such incidents in the past, security measures could be breached by third party actions, intrusion into our software due to flaw in the software by hackers, due to employee error and malfeasance. In addition, we may be required under applicable regulations to notify individuals of data security breaches involving their personal data. Any security breach may cause our customers to lose confidence in the effectiveness of our data security measures, and in turn have an adverse effect on our business, operations, financial condition or cash flows.

Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of the occurrence of any of the above-mentioned events.

Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems as and when needed, to accommodate our growing customer base and range of products.

Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the geographical areas in which we are located.

18. We are exposed to fluctuations in the market values of our investment and other asset portfolio.

Deterioration of the credit and capital markets could result in volatility of our investment earnings and impairments to our investment and asset portfolio, which could negatively impact our financial condition and reported income.

19. We cannot assure you that the deployment of the Net Proceeds in the manner intended by us will result in an increase in the value of your investment.

We intend to utilize the Net Proceeds as set forth in “*Objects of the Offer*” on page 47.

The fund requirement mentioned as a part of the objects of the Offer is based on our estimates and has not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, other financial conditions or business strategies.

Any variation in the objects of the Offer, including variations due to factors or circumstances involving competitive and dynamic market conditions, variation in cost structures, changes in estimates due to delays which may be beyond our control, would require a special resolution of our Shareholders and our Promoter or controlling Shareholders will be required to provide an exit opportunity to our Shareholders who do not agree to such variation, pursuant to Section 27 of the Companies Act 2013. If our Shareholders exercise such an exit option, our share price may be adversely affected, which may affect the value of your investment.

Further, our management will have significant flexibility in temporarily investing the Net Proceeds and there can be no assurance that we will earn significant interest income on, or that we will not suffer unanticipated diminution in the value of, such temporary investments.

20. Our Company and Subsidiary are subject legal proceedings, and an adverse outcome in any such proceedings may adversely affect our business, financial condition and growth strategy.

Our Company and Subsidiary are involved in certain legal proceedings, in the ordinary course of business, which are pending at varying levels of adjudication at different fora, from time to time. There are no outstanding matters involving moral turpitude or criminal proceedings, statutory and regulatory actions and economic offenses involving our Company and Subsidiary. There are no outstanding pending litigation (including tax proceedings) involving our Company and Subsidiary, which are considered “material” i.e., if the monetary amount of claim by or against the entity or person, in any such pending litigation exceeds ₹ 92.56 lakhs (“**Materiality Threshold**”), or any such litigation, an adverse outcome of which would materially and adversely affect our Company’s business, prospects, operations, financial condition or reputation, irrespective of the amount involved in such litigation, except as disclosed below:

Type of proceeding	Number of cases	Amount involved (in ₹ lakhs)
<i>Against the Company</i>		
Tax Proceedings	2	976.23

For further details, please see “*Outstanding Litigation and Defaults*” on page 100 of this Letter of Offer. We cannot assure you that these legal proceedings will be decided in our favour or that there will be no legal proceeding involving our Company and Subsidiary in the future. Such a proceeding, if arises, may adversely affect our business, financial condition and growth strategy.

21. Some of our Directors may have interests in entities, which are in businesses similar to our portfolio companies or support services business, and this may result in conflicts of interest with us.

As on the date of this Letter of Offer, some of our Directors also have interests, as directors or shareholders in other entities engaged in the automotive sector, other NBFCs, or other support services companies, including certain of our related parties, such as our Subsidiary and our Promoter. There can be no assurance that such Directors will not be subject to conflicts of interest or that we will be able to deal with such conflicts of interest in a timely manner.

Further, commercial transactions in the future between us and related parties, though legitimate business transactions conducted at an arm’s length basis, may result in conflicting interests which could have an adverse effect on our operations. Such factors may have an adverse effect on the results of our operations and financial condition. For further details, see “*Financial Statements*” on page 72.

22. The trademark/service mark and logo in connection with the “Sundaram Finance” or “SF” brand which we use is not owned by us and consequently, any infringement of such trademark/service mark and logo may adversely affect our goodwill, operations and profitability.

We use the brand name “Sundaram Finance” and the associated “SF” mark. In this regard, we hold the trademark for “Sundaram Finance Holdings”, but do not enjoy any rights over the “SF” mark or the “Sundaram Finance” mark, which is trademarked by our Promoter and are also used by other companies in the Sundaram Finance group.

In the event of any infringement of such trademark or service mark, we will suffer loss of goodwill and business. Our inability to register such logo and/or to adequately protect the same may adversely affect our goodwill, operations and profitability. Further, in the event of a loss of the “SF” brand, we may not be able to derive the goodwill that we have been enjoying under the “Sundaram Finance” brand. Further, if we are required to enter into commercial terms for use of such trademark or service mark in the future, such commercial terms and conditions including the consideration payable may be commercially unfavourable to our Company and we may be required to allocate a large portions of profits and/or revenues towards such consideration, which would adversely affect our profitability.

We operate in a competitive environment, and we believe that our brand recognition is a significant competitive advantage to us. If we lose the ability to utilise the “Sundaram Finance” or “SF” brand, we may need to change our name, trade mark/service mark or the logo. Any such change could require us to incur additional costs and may adversely impact our goodwill, business prospects and results of operations.

23. We will continue to be controlled by our Promoter after the completion of the Issue.

After the completion of the Issue, our Promoter will continue to exercise control over us, including being able to influence the composition of our Board and influence matters requiring shareholder approval. Our Promoter may take or block actions, which the Promoter, may believe to be in the interest of our Company but may conflict with the interests of our minority shareholders. Through its influence, our Promoter may be in a position to delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. There is no assurance that our Promoter will act to resolve any conflicts of interest in our Company’s or your favour.

24. We have entered into certain related party transactions.

We have entered into transactions with certain related parties. While we believe that all such transactions have been conducted on an arm’s length basis, we cannot assure you that we could not have obtained more favourable terms had such transactions been entered into with unrelated parties. Such transactions may give rise to current or potential conflicts of interest with respect to dealings between us and such related parties. Additionally, there can be no assurance that any dispute that may arise between us and related parties will be resolved in our favour. For more information on our related party transactions, please see “Financial Statements” on page 72.

25. Our Statutory Auditors have provided certain matters of emphasis relating to the Audited Consolidated Financial Statements of our Company. We cannot assure you whether such matter of emphasis will not arise in the future.

Our Statutory Auditors have included certain matters of emphasis in their report to the Audited Consolidated Financial Statements. The Statutory Auditors have drawn attention to Note 32h of audited consolidated financial statements for Fiscal 2020 and Note 27(c) of the Unaudited Condensed Consolidated Interim Financial Statements. For details, see “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Auditor’s Qualification” on pages 72 and 75. Investors should consider these matters in evaluating our financial position, cash flows and results of operations. There is no assurance that our auditors’ reports for any future Fiscal periods will not contain such matters of emphasis.

26. We have certain contingent liabilities which may adversely affect our financial condition.

As per our Financial Statements, as of December 31, 2020 and March 31, 2020, we had contingent liabilities not provided for, aggregating to ₹ 655.81 lakhs and ₹ 1,557.44 lakhs, respectively.

In the event that any of these contingent liabilities materialise, our financial condition may be adversely affected. Further, in the event there is a change in any statutory/ regulatory requirement with respect to contingent liabilities, our Company may be required to make additional provisions to meet the revised criteria which may have an adverse effect on our financial condition and profitability.

27. Our success depends in large part upon our management team and our ability to attract, train and retain such persons and on our relations with our employees.

Our ability to sustain our rate of growth and to meet future business challenges depends significantly upon our ability to manage key issues such as selecting and retaining key managerial personnel, developing managerial experience to address emerging challenges and ensuring a high standard of client service. We are highly dependent on our Directors and our management team. In order to be successful, we must attract, train, motivate and retain highly skilled employees, especially branch managers and relationship executives. If we cannot hire additional qualified personnel or retain them, our ability to expand our business will be impaired and our revenue could decline. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train and motivate our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us. While we have an incentive structure designed to encourage employee retention, our inability to attract and retain talented professionals, or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and/or cash flows.

As of December 31, 2020, we had 720 employees. Currently, none of our employees is members of any labour union. While we believe that we maintain good relationships with our employees, there can be no assurance that we will not experience future disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations.

28. Our Registered and Corporate Office is occupied by our Company and our Subsidiary on lease from our Promoter. The loss of our ability to utilise our Registered and Corporate Office, could adversely affect our activities.

Currently, our Registered and Corporate Office, are not owned by us. Termination of leases or other relevant agreements in connection with such properties which are not owned by us or our failure to renew the same, on favourable conditions, in a timely manner, or at all, could require us to vacate such premises at short notice, and could adversely affect our operations, financial condition and profitability.

29. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business.

We require certain statutory and/or regulatory permits and approvals for our business. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in a timely manner or at all and/or on favourable terms and conditions. Some of these approvals, licenses and permits have expired and we have either made or are in the process of making applications for renewing these approvals. We cannot assure you that our applications for renewal of these approvals will be issued or granted to us in a timely manner, or at all. Failure by us to comply with the terms and conditions to which such permits or approvals are subject and/or to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

30. Any changes in the statutory and/or regulatory requirements in connection with taxation could adversely affect our operations, profitability and cashflows.

The operations, profitability and cash flows could be adversely affected by any unfavourable changes in central and state-level statutory and/or regulatory requirements in connection with direct and indirect taxes and duties, including income tax, goods and service tax and/or by any unfavourable interpretation taken by the relevant taxation authorities and/or courts and tribunals. For example, the GST implemented with effect from July 1, 2017 has replaced the indirect taxes on goods and services, such as central excise duty, service tax, central sales tax, state value added tax, surcharge

and excise, collected by the central and state governments. The GST has increased administrative compliance for the Companies which is a consequence of increased registration and form filing requirements.

31. Differences exist between Ind AS and other accounting principles, such as IFRS, which may be material to investors' assessments of our financial condition.

Our Company has prepared the annual financial statements under Ind AS for the Fiscal 2020 as required under Section 133 of the Companies Act, 2013. From April 1, 2019, our Company has computed key parameters including fair value of investments derived from the financial statement prepared in accordance with Ind AS. Our historical financial statements relating to any period prior to Fiscal 2019 may not be comparable to the audited consolidated and standalone financial statements prepared under Ind AS. Ind AS and other accounting standards like IFRS differ in certain respects including first time adoption choices available.

32. Our insurance coverage may not adequately protect us against losses.

We maintain such insurance coverage as we believe is adequate for our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We maintain general liability insurance coverage, including coverage for errors or omissions. We cannot, however, assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of a larger deductible or co - insurance requirement, could adversely affect our business, financial condition and results of operations.

33. Our ability to pay dividends will depend on our future earnings, cash flows, working, capital requirements, financial condition, and restrictive covenants under our financing arrangements.

Any future determination as to the declaration and payment of dividends will be decided by our Board and will be subject to the discretion of the Shareholders. The amount of our future dividend payments, if any, will depend on various factors such as our future earnings, cash flows, financial condition, working capital requirements, capital expenditures, restrictive covenants under our financing documents and in accordance with applicable laws. We may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on the Equity Shares. The amounts paid as dividends in the past are not necessarily indicative of our Company's dividend policy or the dividend amounts, if any, in the future. There is no guarantee that any dividends will be paid or that the amount thereof will not be decreased in the future.

External Risks

34. Changes in environmental or other laws may lead to a decline in the sale of vehicles, which could adversely affect our business, results of operations and prospects.

Our Company is engaged in investments in automotive sector in India. Any regulation passed by either the central Government or any of the state Governments, or any orders of judiciary to ban the sale of a particular segment of vehicles or impose additional taxes on any particular segment of vehicles, could lead to a decline in the sales of such vehicles. For example, the Supreme Court of India imposed a ban on the sale of vehicles not complying with Bharat Emission Standards IV. Such regulatory amendments or orders of the judiciary may lead to a decline in sales of our portfolio companies and adversely affect our business, results of operations and prospects.

The automobile industry has witnessed substantial changes in recent years, including, among others, continued consolidation, outsourcing, decreasing profit margins in certain segments, regulatory changes, shifts in production to low-cost manufacturing centres and technological changes.

Our investment vertical is directly related to our portfolio companies' sales and production levels across various segments. Automotive sales and production are highly cyclical and depend on general economic conditions and other factors, including consumer spending and preferences as well as changes in interest rate levels, consumer confidence and fuel costs. For example, the recent growth in sales of electric vehicles, which is currently more prevalent for personal vehicles, may shift towards commercial vehicles as well, thereby directly impacting performance of certain portfolio companies engaged in manufacture of fuel based automotive components. The sales of our portfolio companies are also affected by inventory levels and production levels of automotive manufacturers. We cannot predict when manufacturers will decide to either build or reduce inventory levels or whether new inventory levels will approximate historical inventory levels. This may result in variability in sales and financial condition of our portfolio companies. Uncertainty regarding inventory levels may be exacerbated by favourable consumer financing programs initiated by manufacturers, which may accelerate sales that would otherwise occur in future periods. As automotive manufacturing companies generally have high fixed production costs, even relatively modest declines in customers' production levels and thus, production volumes, can have a significant adverse impact on their profitability. In addition, lower global automotive sales during the global financial crisis and the recent pandemic resulted in substantially all automotive manufacturers lowering vehicle production schedules. Continued uncertainty and other unexpected fluctuations could have an adverse effect on our business, results of operations and financial condition.

The automobile industry is also subject to seasonal characteristics. In addition, the automotive component industry is sensitive to other factors beyond our control such as technological changes, cyclicity and unforeseen events, including political instability, recession, inflation, further volatility in fuel prices and other adverse occurrences. Any such event that results in decreased demand in the automotive industry, or increased pressure on automobile manufacturers to develop, implement and maintain in-house automotive component facilities, could have an adverse effect on our business, results of operations and financial condition.

35. Any slowdown in economic growth in India may adversely affect our business, results of operations and financial condition.

Our financial performance and the quality and growth of our business depend significantly on the health of the overall Indian economy, the gross domestic product growth rate and the economic cycle in India. All our assets and employees are located in India. Further, economic developments outside India also adversely affect the Indian economy. Accordingly, our business is affected by domestic and international economic conditions, including rates of economic growth and the impact that such economic conditions have on consumer spending.

Our performance and the growth of our business depends on the performance of the Indian economy and the economies of the regional markets we currently serve. These economies could be adversely affected by various factors, such as political and regulatory changes including adverse changes in liberalization policies, social disturbances, religious or communal tensions, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any slowdown in these economies could adversely affect the ability of our customers to afford our services, which in turn would adversely affect our business, results of operations and financial condition.

The current economic downturn that has led to an increased level of consumer delinquencies, lack of consumer confidence, decreased market valuations and liquidity, increased market volatility and a widespread reduction of business activity generally, may enhance market volatility. The resulting economic pressure and dampened consumer sentiment may adversely affect our business and our results of operations.

There can be no assurances that government responses to the disruptions in the financial markets will restore consumer confidence, the markets or increase liquidity and the availability of credit. Continuation or worsening of this downturn or general economic conditions may have an adverse effect on our business, liquidity and results of operations.

36. A decline in India's foreign exchange reserves may affect liquidity and interest rates in the Indian economy, which could adversely impact us.

One of the direct adverse impacts of the global financial crisis on India has been the reversal of capital inflows and a decline in exports, leading to pressures on the balance of payments and a sharp depreciation of the Indian Rupee vis-à-vis the U.S. dollar. Any increased intervention by the RBI in the foreign exchange market to control the volatility of the exchange rate may result in a decline in India's foreign exchange reserves and reduced liquidity and higher interest rates in the Indian economy, which could adversely affect our business and our future financial performance.

37. Any downgrading of India's debt rating by an international rating agency could adversely affect our business, results of operations and financial condition.

Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact our ability to raise additional finances at favourable interest rates and other commercial terms. For example, Fitch Ratings has recently revised the outlook on India's sovereign ratings from stable to negative, while Moody's Investors Services has downgraded foreign currency and local currency long term issuer ratings to BAA3. This could have an adverse effect on our growth, financial performance and our operations.

38. Civil unrest, acts of violence, including terrorism or war involving India and other countries, could materially and adversely affect the financial markets and our business.

Civil unrest, acts of violence, including terrorism or war, may negatively affect the Indian stock markets and also materially and adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, make travel and other services more difficult and ultimately materially and adversely affect our business. Although the governments of India and neighbouring countries have recently been engaged in conciliatory efforts, any deterioration in relations between India and neighbouring countries might result in investor concern about stability in the region, which could materially and adversely affect our business, results of operations and financial condition.

39. Our business may be adversely impacted by natural calamities, unfavourable climatic changes, health epidemics or pandemics.

Natural disasters such as floods, earthquakes, famines and droughts have in the past had a negative impact on the Indian economy. Further, health epidemics and pandemics like the recent COVID-19 pandemic have also affected the Indian economy negatively. If any such natural disaster, unfavourable climatic changes or health epidemics and pandemics were to occur, our business could be affected due to the event itself or due to the inability to effectively manage the effects of the particular event.

Our operations, including our branch network, may be damaged or disrupted as a result of political instability, natural disasters such as earthquakes, floods, heavy rainfall, epidemics, tsunamis and cyclones and other events such as protests, riots and labour unrest. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our senior management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our branch network. Any of the above factors may adversely affect our business, results of operations and financial condition.

40. Companies operating in India are subject to a variety of central and state government taxes and surcharges.

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, value added tax, turnover tax, service tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. The statutory corporate income tax in India, which includes a surcharge on the tax and an education cess on the tax and the surcharge, may range up to 29.12%. The central or state government may in the future further increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may

result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations.

41. Investors may have difficulty enforcing foreign judgments in India against our Company or our management.

Our Company is a limited liability public company incorporated under the laws of India. All of our Company's directors and executive officers named herein are residents of India and all or a substantial portion of the assets of our Company and such persons are located in India. As a result, it may not be possible for investors to effect service of process on our Company or such persons in jurisdictions outside of India, or to enforce against them judgments obtained in courts outside of India. In addition, India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. The manner of recognition and enforcement of foreign judgments in India is dependent on whether the country in which the foreign judgment has been pronounced is a reciprocating territory or not. A party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate outside India any amount recovered pursuant to execution. Any judgment in a foreign currency would be converted into Indian Rupees on the date of the judgment and not on the date of the payment. Our Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

Risks pertaining to this Issue

42. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renoucees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renoucees prior to the Issue Closing Date. Further in case the Rights Entitlements do not get credited in time, in case of On Market Renunciation (the last day for which is Friday, May 28, 2021), such Renoucee will not be able to apply in this Issue with respect to such Rights Entitlements.

43. There may be less information available in the Indian securities markets than in more developed securities markets in other countries.

There is a difference between the level of regulation and monitoring of the Indian securities markets and that of the activities of investors, brokers and other participants in securities markets in more developed economies. SEBI is responsible for monitoring disclosure and other regulatory standards for the Indian securities market. SEBI has issued regulations and guidelines on disclosure requirements, insider trading and other matters. There may be less publicly available information about Indian companies than is regularly made available by public companies in more developed countries pursuant to such disclosure requirements, which could adversely affect the market for our Equity Shares. As a result, investors may have access to less information about our business, financial condition, cash flows and results of operation, on an ongoing basis, than investors in companies subject to the reporting requirements of other more developed countries.

44. We may, at any time in the future, make further issuances or sales of our Equity Shares, and this may significantly dilute your future shareholding and affect the trading price of our Equity Shares.

Any future equity issuances by us, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of our Equity Shares, which may lead to other adverse consequences for us including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception that such

issuance or sales of shares may occur, may lead to dilution of your shareholding, significantly affect the trading price of our Equity Shares and our ability to raise capital through an issue of our securities. There can be no assurance that such future issuance by us will be at a price equal to or more than the Issue Price. Further, there can be no assurance that we will not issue further shares or that the major shareholders will not dispose of, pledge or otherwise encumber their shares.

45. Investors may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares and Rights Entitlements.

Under current Indian tax laws and regulations, capital gains arising from the sale of shares in an Indian company are generally taxable in India. Previously, any gain realised on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long-term capital gains tax in India if securities transaction tax (“STT”) was paid on the sale transaction. However, now tax is payable on such long-term capital gains exceeding ₹1,00,000 arising from sale of equity shares on or after April 1, 2018, while unrealized capital gains earned up to January 31, 2018 on such Equity Shares are exempted.

Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which our Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of our Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of our Equity Shares Rights Entitlements.

46. We will not distribute this Letter of Offer, the Abridged Letter of Offer, the Application Form and the Rights Entitlement Letter to certain categories of overseas shareholders.

In accordance with the SEBI ICDR Regulations and SEBI Rights Issue Circulars, our Company will send, primarily through email, the Abridged Letter of Offer, Application Form and other applicable Issue materials to the email addresses of all the Eligible Equity Shareholders who have provided their Indian addresses to our Company. Further, this Letter of Offer will be provided, to those who make a request in this regard. In the event that e-mail addresses of the Eligible Equity Shareholders are not available with the Company or the Eligible Shareholders have not provided valid e-mail addresses to the Company, our Company will dispatch the Abridged Letter of Offer, Application Form and other applicable Issue materials by way of physical delivery as per the applicable laws to those Eligible Equity Shareholders who have provided their Indian address. Investors can also access this Letter of Offer, the Abridged Letter of Offer and the Application Form from the websites of the Registrar, our Company, the Lead Manager, the Stock Exchange and on R-WAP. Other than as indicated above, the Issue materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of the Issue materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. We have requested all the overseas Eligible Equity Shareholders to provide an address in India and their e-mail addresses for the purposes of distribution of the Issue materials. However, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

47. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our

business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Rights Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Rights Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

48. You may not receive the Rights Equity Shares that you subscribe in this Issue until 15 days after the date on which this Issue closes, which will subject you to market risk.

The Rights Equity Shares that you may be Allotted in this Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Rights Equity Shares only after they have been credited to an your demat account and the receipt of the listing and trading approval in respect thereof. There can be no assurance that the Rights Equity Shares allocated to you will be credited to your demat account, or that trading in such Rights Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

49. The R-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.

In accordance with the R-WAP Circulars, a separate web based application platform, i.e., the R-WAP facility (accessible at <https://rights.cameoindia.com/sfhl>), has been instituted for making an Application in this Issue by resident Investors. Further, R-WAP is only an additional option and not a replacement of the ASBA process. On R-WAP, the resident Investors can access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account thereat. For details, see "*Terms of the Issue - Procedure for Application through R-WAP*" on page 127. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology;
- payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policy effectively to such payment mechanisms;
- keeping users' data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Investors should also note that only certain banks provide a net banking facility by way of which payments can be made on the R-WAP platform. In the event that your bank does not provide such facility, you will have to use an UPI ID to make a payment. Further, R-WAP is a new facility which has been instituted due to challenges arising out of COVID-19 pandemic. We cannot assure you that R-WAP facility will not suffer from any unanticipated system failure or breakdown or delay, including failure on the part of the payment gateway, and therefore, your Application may not be completed or rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the payment mechanism for this Issue. Since Application process through R-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the R-WAP facility.

50. Investors will not have the option of getting the Allotment of Rights Equity Shares in physical form.

In accordance with SEBI ICDR Regulations, the Rights Equity Shares shall be issued only in dematerialised form. Investors will not have the option of getting the allotment of Rights Equity Shares in physical form. The Rights Equity

Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. This further means that they will have no voting rights in respect of the Rights Equity Shares. For details, see “*Terms of the Issue – Credit and Transfer of Rights Equity Shares in case of Shareholders holding Equity Shares in Physical Form and disposal of Rights Equity Shares for non-receipt of demat account details in a timely manner*” on page 142 of the Letter of Offer.

51. SEBI has recently streamlined the process of rights issues. You should follow the instructions carefully, as stated in relevant SEBI circulars, and in this Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI Rights Issue Circulars, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 113.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circulars, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) demat suspense escrow account (namely, “SFHL Rights Entitlement Suspense Escrow Demat Account”) opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit/credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) Equity Shares held by Eligible Equity Shareholders holding Equity Shares in physical form as on Record Date where details of demat accounts are not provided by Eligible Equity Shareholders to our Company or Registrar; or (e) credit of the Rights Entitlements returned/reversed/failed; or (f) the ownership of the Equity Shares currently under dispute, including any court proceedings.

52. Investors will be subject to market risks until the Rights Equity Shares credited to their demat accounts are listed and permitted to trade.

Investors can start trading the Rights Equity Shares allotted to them only after they are listed and permitted to trade. Since the Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for the Rights Equity Shares to the date when trading approval is granted for them. Further, there can be no assurance that the Rights Equity Shares allocated to an Investor will be credited to the Investor’s demat account or that trading in the Equity Shares will commence in a timely manner.

53. Eligible Equity Shareholders holding Equity Shares in physical form will have no voting rights in respect of Equity Shares until they provide details of their demat account and Equity Shares are transferred to such demat account from the demat suspense account thereafter.

The Equity Shares will be credited to a demat suspense account to be opened by our Company, in case of Allotment in respect of resident Eligible Equity Shareholders holding Equity Shares in physical form and who have not provided the details of their demat account to the Registrar or our Company at least two Working Days prior to the Issue Closing Date. Such Eligible Equity Shareholders are required to send, amongst others, details of their demat accounts to our Company or the Registrar to enable our Company to transfer, after verification of the details of such demat account by the Registrar, the Rights Equity Shares from the demat suspense account to the demat accounts of such Eligible Equity Shareholders. Unless and until such Eligible Equity Shareholders provide details of their demat account and the Equity Shares are transferred from demat suspense account to such demat accounts thereafter, they will have no voting rights in respect of Equity Shares. For details, see “*Terms of the Issue*” on page 113.

54. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of our Equity Shares.

Foreign investment in Indian securities is subject to regulation by Indian regulatory authorities. Under the FDI Policy, issued by the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India, foreign investment up to 100% is permitted in our sector, subject to satisfaction of certain conditions.

Also, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are permitted (subject to certain exceptions) if they comply with, among other things, the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares does not comply with such pricing guidelines or reporting requirements, or falls under any of the exceptions referred to above, then prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate any such foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

55. Overseas shareholders may not be able to participate in the Company's future rights offerings or certain other equity issues.

If the Company offers or causes to be offered to holders of its Equity Shares rights to subscribe for additional Equity Shares or any right of any other nature, the Company will have discretion as to the procedure to be followed in making such rights available to holders of the Equity Shares or in disposing of such rights for the benefit of such holders and making the net proceeds available to such holders. For instance, the Company may not offer such rights to the holders of Equity Shares who have a registered address in the United States unless:

- a registration statement is in effect, if a registration statement under the US Securities Act is required in order for the Company to offer such rights to holders and sell the securities represented by such rights; or
- the offering and sale of such rights or the underlying securities to such holders are exempt from registration under the provisions of the US Securities Act.

The Company has no obligation to prepare or file any registration statement. Accordingly, shareholders who have a registered address in the United States may be unable to participate in future rights offerings and may experience a dilution in their holdings as a result.

56. Your ability to acquire and sell the Rights Equity Shares offered in the Issue is restricted by the distribution, solicitation and transfer restrictions set forth in this Letter of Offer.

No actions have been taken to permit a public offering of the Rights Equity Shares offered in the Issue in any jurisdiction except India. As such, our Rights Equity Shares have not and will not be registered under the U.S. Securities Act, any state securities laws or the law of any jurisdiction other than India. Further, your ability to acquire Rights Equity Shares is restricted by the distribution and solicitation restrictions set forth in this Letter of Offer. For further information, see "Notice to Investors" and "Other Regulatory and Statutory Disclosures – Selling Restrictions" and "Restrictions on Purchases and Sales" on pages 10, 109 and 150, respectively. You are required to inform yourself about and observe these restrictions. Our representatives, our agents and us will not be obligated to recognize any acquisition, transfer or resale of the Rights Equity Shares made other than in compliance with applicable law.

INDIAN AUTOMOBILE INDUSTRY

The Indian automobile industry accounts for 7% of India’s GDP and about 49% of manufacturing sector. The industry has grown steadily over the past decade driven by economic growth, rising per capita income, low penetration levels and improving financing accessibility. Between FY2011 and FY2019, the total domestic sales of automobiles in India grew at a CAGR of 7.4%, before witnessing a sharp contraction of 17.7% in FY2020. Across segments of the industry, India is positioned amongst the leading markets, globally. In volume terms, India ranks as the largest market for two-wheelers (2Ws), three-wheelers (3Ws) as well as tractors. It is also among the top five markets for medium & heavy commercial vehicles (M&HCVs) and passenger vehicles (PVs). Besides favourable growth prospects, India’s favourable foreign direct investment (FDI) policy, relatively low cost of manufacturing, adequate manpower pool has attracted several foreign original equipment manufacturers (OEMs) of the industry to invest in India and set up a manufacturing footprint.

Apart from a reasonably-sized domestic market, exports of automobiles have also grown at a steady pace (i.e. at a CAGR of 8.6%) over the past decade (FY2011-20). Besides domestic players, several foreign OEMs have established India as their key manufacturing hub. Although, traditionally, a sizeable proportion of India’s exports may be directed to the emerging markets, the increasing focus on both domestic as well as foreign OEMs is gradually shifting the proportion of exports in favour of the developed markets as well. With a competitive manufacturing base, favourable policy environment and availability of well-established vendor base, India ranks favourably with other export-focused nations. These factors, along with the favourable growth prospects domestically, are likely to support investments by the OEMs going forward.

Indian Two-Wheeler Industry

ICRA’s Outlook

The domestic two-wheeler industry is likely to witness a second consecutive year of demand contraction with volumes contracting between 16-18% in FY2021. This would completely off-set increase in per unit realisations due to the BS-VI transition. However, assuming impact of the pandemic is contained in FY2021, the industry is expected to ramp-up consistently and achieve Rs. 1.3 lakh crore in revenues by end of FY2023 (CAGR of 6% FY2020-FY2023).

Exhibit 1: Projected Two-Wheeler Sales in the Domestic Market (FY 2018-2023) (in unit sales)

Source: ICRA research

Indian Passenger Vehicle Industry Outlook

ICRA research estimates domestic passenger vehicle demand to decline by 22% to 25% in FY2021, as multiple lockdown extensions have a direct bearing on the economic environment and consumer sentiments. Q1 FY2021 wholesale volume is already down by 78% YoY, which will have a bearing on the annual growth rate. While the demand environment is muted, a low base of Q2 FY2020 (when wholesale dispatches declined by 29% YoY) has moderated the pace of decline in Q2 FY2021. Most dealerships were operating at a lean inventory, and hence some inventory restocking at dealership will also support wholesale dispatches though retail sales will be relatively lower than wholesale ones in FY2021.

Exhibit 2: Projected PV sales in the domestic market (FY 2018-2023) (in unit sales)

Source: SIAM, ICRA Research

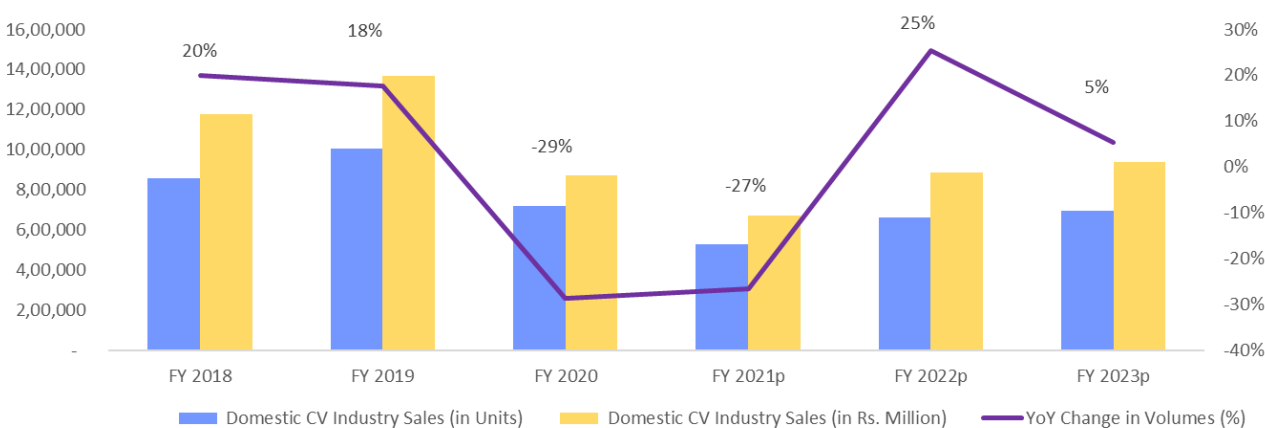

Owing to the low base effect as well as the expected pick-up in economic activity, the PV industry will witness strong double-digit (over 15%) growth in the subsequent fiscal i.e. FY2022. Over the medium-term duration, ICRA expects the PV industry to revert to a volume CAGR of 6-8% (domestic + exports). The market share in the domestic PV segment is expected to remain concentrated, with top five players constituting over 80% to the overall market. This implies that profitability pressures on the relatively low volume players may be even higher, resulting in sustained dependence on external financing to fund losses and capital expenditure requirements. Nevertheless, players having low volume in the domestic market can leverage on labour arbitrage present in the Indian market and can develop an export hub for their small car requirement globally.

Indian Commercial Vehicle Industry

ICRA's Outlook

The domestic CV industry witnessed one of the worst years in history in FY2020, with wholesale dispatches contracting by a sharp 29%. The segment continues to witness headwinds from all fronts, be it financing availability, macroeconomic environment, regulatory developments or fleet operator health. These headwinds have compounded with the outbreak of the pandemic and the lockdowns imposed in the country for an extended period, adding production constraints to the existing set of challenges. The only limited green shoot visible is the uptick in rural demand, which augurs well for the LCV (Truck) segment, although the ability to recoup lost sales of Q1 FY2021 remains to be seen. Accordingly, ICRA expects the domestic CV industry volumes to contract further by 25-28% in FY2021, which would bring industry volumes to the lowest levels in more than a decade. Although ICRA believes growth would be optically better in FY2022 at 24-27%, the recovery to industry volumes of even FY2017 levels would remain some time away.

Exhibit 3: Projected CV Sales in the Domestic Market (volumes and value)

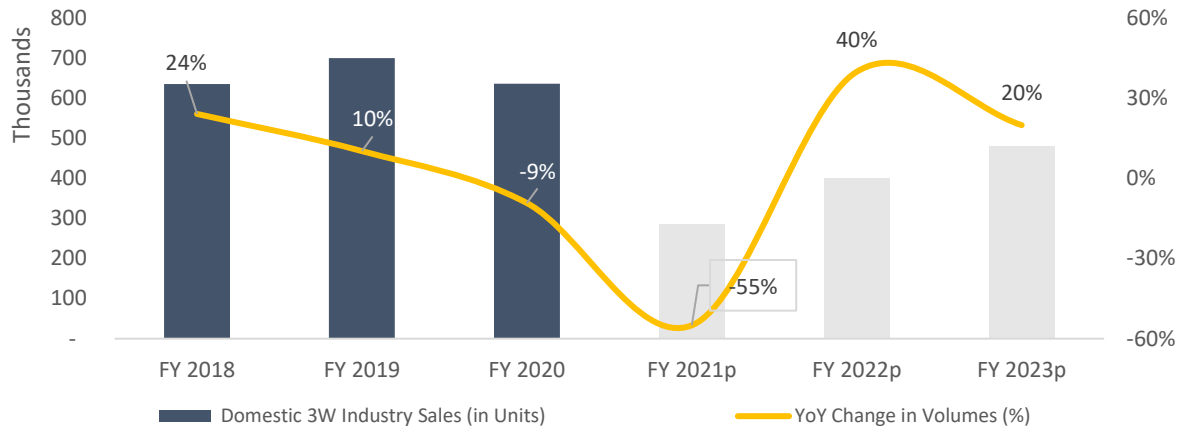

Source: SIAM, ICRA Research

Indian Three-Wheeler Industry

ICRA's Outlook

The domestic 3W segment is expected to report a sharp volume contraction in the current fiscal, given the extremely subdued demand sentiments. The passenger carrier segment would be most impacted as people continue to shy away from public transport. Although the goods carrier segment would fare relatively better, given the demand for last-mile transportation, especially of essentials, the same would be unable to offset the sharp contraction in passenger carrier segment. Accordingly, domestic 3W volumes are expected to contract by 50-60% in the current fiscal. Although growth would look optically better in the upcoming fiscal, recovery to pre-pandemic levels would be a longer-term phenomenon.

Our Strengths

Trusted brand and strong parentage

Our Promoter is Sundaram Finance Limited, a company with more than 66 years of history. Sundaram Finance Limited is present in various facets of the Indian finance industry, including vehicle finance, leasing, equipment finance, insurance and mutual funds. We believe that the ‘Sundaram Finance’ brand, owing to its long operational history, has immense brand recall in Indian financial markets and amongst customers generally. A significant portion of our Company’s support services business is sourced from our Promoter. Further, our brand and strong parentage allows our Subsidiary to source its business process outsourcing business from third parties.

We believe that our parentage and brand are strengthened by robust governance practices followed by us since inception. We strive to achieve and maintain high standards of integrity, dedicated customer service, fair business practices, efficient, safe and trusted financial policies of the Sundaram Finance Group.

Strong track record of financial performance supported by comprehensive investment philosophy and risk management

Our investment philosophy is based on the belief that the automotive sector is value accretive and over time could potentially be a significant contributor to the Indian economy. The focus of our research effort is on understanding the businesses and the key drivers, forming a view on such key drivers and understanding the risks. The research process emphasizes both quantitative and qualitative aspects. Quantitative aspects of research include key factors and growth prospects of the industry, our company’s competitive position in the industry, analysis of our company’s financial statements and performance, amongst other factors. Qualitative aspects of research focus on our company’s management and on the corporate governance standards, amongst other factors. We believe that long-term focus with an understanding of short-term factors, investment discipline, risk management and a team of talented individuals are key to a successful investment. As a result of this approach, we have been able to deliver strong and consistent financial performance. Presence across automotive manufacturing value chain

We have investments in 15 portfolio companies across the automotive manufacturing value chain, with investments in portfolio companies engaged in various aspects of automotive manufacturing including axles, axle housing, wheels and suspension, fuel injection equipment, precision aluminium cast products, iron castings, spare parts and electrical equipment. In volume terms, India ranks as the largest market for two-wheelers, three-wheelers as well as tractors. The Indian automobile industry accounts for 7% of India’s GDP and about 49% of manufacturing sector. The industry has grown steadily over the past decade driven by economic growth, rising per capita income, low penetration levels and improving financing accessibility. Between FY2011 and FY2019, the total domestic sales of automobiles (including tractors) in India grew at a CAGR of 7.4%, before witnessing a sharp contraction of 17.7% in FY2020. (Source: ICRA Report)

We have expanded our investment portfolio as we believe that our investments across the manufacturing value chain allows us to benefit from a de-risked strategy. Further, we have presence in the distribution of automotive components through our investment in India Motor Parts and Accessories Limited. Our presence across diverse manufacturing

processes and automotive components, including light-weight materials utilised in the aerospace sector and components required for the manufacture of alternative fuel vehicles allow us to effectively pursue a de-risked strategy with limited reliance on any one sector or fuel type or vehicle type.

Experienced senior management team and access to pool of skilled employees

Our senior management team brings to our Company industry experience and knowledge of cost and operational efficiencies, financial structuring, marketing, business strategy and development. In addition, through our Promoter, we have access to a large pool of skilled employees.

Further, we believe that we benefit from our access to the Sundaram Finance group's strong corporate governance standards and experienced manpower, which in turn allows us to have access to large number of employees who possess experience in the finance and automotive sectors.

Further, we are involved in the imparting of group level learning for employees of the Sundaram Finance group, through the Sundaram Learning division, which is part of our shared services business, vested in our Company pursuant to the scheme of arrangement and amalgamation between our Promoter, our Company, and certain other transferor companies, approved by the National Company Law Tribunal by way of an order dated January 12, 2018, in accordance with which, certain identified shared services from Sundaram BPO India Limited and certain training services, non-core investments and identified immovable properties from our Promoter were transferred into and vested in our Company, as a going concern, with effect from April 1, 2016. We believe that these policies and in-house training centre, allows us to train and continuously upskill employees for the rights roles in the organisation.

Established track record in support services industry in overseas jurisdiction with a scalable business model

We also offer support services domestically to our portfolio companies and internationally through our Subsidiary to over 40 clients, located in various offshore jurisdictions, including Australia. We offer support services to clients in various sectors, including financial services and insurance. We provide our services through a dedicated continuously available location in Chennai and have more than 652 employees for our shared services, as on December 31, 2020.

The Global BPM spend stood at US\$ 198 billion in calendar year 2020 and has grown at a CAGR of approximately 2.8% over calendar years 2013 to 2020 period. During the same period the BPO outsourcing market has reported a CAGR of 7.4%. The share of BPM outsourcing in the global BPM spend has increased from 32.3% in calendar year 2013 to 45.5% in calendar year 2020 led by cost pressures, availability of requisite manpower quality in low-cost countries such as India, Philippines and increased maturity of BPO outsourcing market evolving to non-voice based knowledge services, usage of analytics, automation and robotic process automation from erstwhile pure play voice-based consumer interaction support. The India BPO market is the largest contributor to the global outsourcing market with 38% market share. The exports market contributed 88% of the Indian BPO market and stood at US\$34.0 billion with growth of 2.4% in FY2021e. The growth during Fiscal 2021 was impacted by COVID-19 pandemic induced lockdown during the first half of Fiscal 2021, though has subsequently recovered. The exports market has grown at a marginally faster pace compared to the overall BPO industry with FY2014-2021e CAGR of 7.9%. (*Source: ICRA Report*)

Through our Subsidiary and the erstwhile Sundaram BPO India Limited, we have been providing support services both within the Sundaram Finance group and to external clients. We believe that our track record of delivering large, complex and multi-location projects makes us a recognised brand in certain jurisdictions like Australia and provides us with recall value to our clients.

Tested risk management and investment strategies

Risk is an inherent and integral part of the business of investments and business process outsourcing. We aim to achieve an appropriate balance between risk and returns by establishing an efficient risk mitigation system. In order to mitigate risks, we have instituted a risk management framework, wherein, the Audit Committee under the supervision of the Board is tasked with regular assessment and laying down of policies for management of risks.

In respect of certain investments, we have established systems to conduct due diligence of proposals received and to ensure that investments are in line with the overall objectives of our Company.

Our Strategies

Capitalise on acquisition opportunities with a focus on the automotive space

We aim to grow our investment portfolio by exploring fresh investment opportunities in the automotive space and by consolidating our holdings in the existing portfolio companies, whenever such opportunity arises. ICRA expects the automotive industry to register strong growth in Fiscal 2022, supported by expected pickup in economic activity as well as low base effect. ICRA also expects export revenues in the auto component industry to grow at healthy pace, supported by the government's "Make in India" initiative, increasing exports by few domestic original equipment manufacturers ("OEMs") and healthy growth in the US automotive market. Over the medium to long term, increasing efforts by OEMs on localization of raw material and increasing component value/sophistication per vehicle platform is a positive for industry. Further, revenue growth is expected to accelerate from Fiscal 2022 onwards, with robust growth expectation for the two wheeler, personal vehicle and commercial vehicle industry. With increasing import substitution, thrust of 'Make in India' (to boost exports) and overall improvement in demand, ICRA expects the industry to grow at CAGR of 8-10% growth during FY20 – FY25, with an upward bias. (*Source: ICRA Report*)

For example, we have recently invested in Mind S.r.l, a company incorporated in Italy, which is engaged in design and manufacture of industrial and commercial components in composite materials, a sector which we believe could be value accretive in the future.

Further, the objective of this Issue is to utilise the proceeds to acquire 7.71% of Brakes India Private Limited, a company which is a leading supplier of braking systems in the personal vehicle and commercial vehicle segments. (*Source: ICRA Report*) We currently hold 6.67% in Brakes India Private Limited and are categorised as one of the promoters of BIPL and earned a total dividend income of ₹ 698.43 lakhs from BIPL in Fiscal 2020.

Strategically expand our presence in automobile manufacturing / components segments which are more value additive

As per the ICRA Report, with a competitive manufacturing base, favourable policy environment and availability of well-established vendor base, India ranks favourably with other export-focused nations. These factors, along with the favourable growth prospects domestically, are likely to support investments by the OEMs going forward. We believe that on account of our extensive experience in the automotive sector as well as our existing network of portfolio companies engaged in various sub-sectors of automotive manufacturing and distribution, we are in a position to identify emerging opportunities and trends. This further allows us to identify and consider investments in companies engaged in such segments. For example, ICRA expects electric vehicle penetration to remain low (3-5%) till 2025. However, over the longer-term horizon, once BEV achieves price parity with ICE counterparts, EV may experience exponential growth. Accordingly, there is a possibility of an increased use of composite materials in the automotive and aerospace sectors. With a view to making timely use of this opportunity we have invested in Mind S.r.l.

We will continue to explore investment opportunities in companies in the automotive sector, especially in sectors which we believe are value accretive or may provide greater growth opportunities and returns in the long term. Further, we will continue to make an effort to consolidate our holdings in portfolio companies in a conscious manner, as and when a favourable opportunity arises. For example, the objects of this Issue will be utilised for acquisition of additional shareholding in Brakes India Private Limited.

Diversify our investment portfolio

Our investment portfolio is currently focussed largely on companies engaged in the automotive sector. In keeping with our strategy of diversification of our portfolio, we have also ventured into certain automotive allied sectors,

namely, the insurance sector. As of December 31, 2020, we held investments in an IRDAI registered insurance broker, which owns, operates and manages an online insurance aggregator platform.

While we may not actively seek to diversify into the non-automotive space in the near term, we believe that having non-automotive investments, especially in sectors such as insurance, allows us to effectively diversify our investment portfolio and to hedge our investments against industry wide or sector specific risks.

Expand our support services business, either in number of clients or revenue or geographically

Our support services business is currently focussed on provision of shared services to certain of our portfolio companies and provision of back-office services to the small and medium enterprise sector in Australia, India, New Zealand and United Kingdom, through our Subsidiary. Through SBSL, we are in the process of including robotic process automation (“RPA”) capabilities by partnering with a third party RPA solution provider, to enable us to move from being a pure play business process outsourcing player to a business transformation company providing three broad solution delivery models to clients, namely, automation solutions, extended office support (outsourcing solutions) and managed services (combination of automation solutions and outsourcing solutions).

We believe that our long term presence in the Australian market has made us a recognised name in the SME segment in that market. We intend to capitalise on our presence and long term client relationships to provide more value added services to our existing clients and to seek newer clients, especially for our RPA based services.

Our Business

Our business is divided into two broad verticals, our investments vertical, consisting of our investment in our portfolio companies and our support services vertical, consisting of domestic support services rendered to our key portfolio companies and overseas support services rendered to third parties by our Subsidiary.

The following table sets out our revenues from each of our business verticals for the periods mentioned:

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by Institute of Chartered Accountant (ICAI) and we have fulfilled our other ethical responsibilities in accordance with provision of the Act. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the consolidated financial statements.

Emphasis of matter

We draw your attention to Note 32h of the consolidated financial statements wherein the Holding Company has disclosed impact assessment due to COVID-19 pandemic. As stated in the said note, the impact assessment carried out by the Management with available information did not indicate any material impact on the carrying value of assets and liabilities of the Group as on the reporting date or any adverse impact on ability of the Group to continue as a going concern. Considering the uncertainties prevailing in the economic conditions globally and in India, such impact assessment done by the Management is highly dependent on the circumstances as they evolve in subsequent periods.

Our opinion is not modified in respect of this matter.

Information Other than the Consolidated Financial Statements and Auditor's Report Thereon

The Holding Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in Management Discussion and Analysis; Board's Report including Annexure and Corporate Governance Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in term of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance, consolidated total comprehensive income, consolidated changes in equity and consolidated cash flows of the Group including its Associates in accordance with Ind AS and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group and of its associates are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associates are responsible for assessing the ability of the Group and of its associates to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associates is also responsible for overseeing the financial reporting process of the Group and of its associates.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- (i) Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

l

- (ii) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Group and its associates which are companies incorporated in India, has adequate internal financial controls system in place and the operating effectiveness of such controls.
- (iii) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- (iv) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its associates to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and its associates to cease to continue as a going concern.
- (v) Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- (vi) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its associates to express an opinion on the consolidated financial statements. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annexure – “A” referred to in Clause (f) under ‘Report on Other Legal and Regulatory Requirements’ section of our audit report of even date to the members of Sundaram Finance Holdings Limited (“the Holding Company”) on the Consolidated Financial Statements of the Company for the year ended 31st March, 2020

In conjunction with our audit of the Consolidated Financial Statements of the Holding Company as of and for the year ended 31st March 2020, we have audited the internal financial controls over the financial reporting of Sundaram Finance Holdings Limited (“the Holding Company”) and its subsidiary and associate companies, which are companies incorporated in India as of that date.

Management’s Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company, its subsidiary companies and associate companies which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by these entities considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over financial reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding company, its subsidiary companies and associate companies, which are companies incorporated in India based on our audit.

We conducted our audit in accordance with the Guidance Note and the Standards on Auditing prescribed under sections 143(10) of the Act to the extent applicable to an audit of internal financial controls. The Guidance Note and those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal controls based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by other auditors in terms of their report too in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of aforesaid entities.

Meaning of Internal Financial Controls Over Financial Reporting

A Company's internal financial controls over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that:

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
3. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

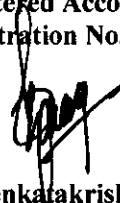

In our opinion, to the best of our information and according to the explanations given to us the Holding company, its subsidiary and its associate companies, which are companies incorporated in India, have in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020 based on, the internal control over financial reporting criteria established by these entities considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial reporting issued by the ICAI.

Other Matters

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole;

Level 1 - The fair value of financial instruments traded in active markets (such as publicly traded securities) is based on quoted (unadjusted) market prices at the end of the reporting period. The quoted market price used for financial assets held by the Group is the current bid price.

Level 2 - The fair valuation of instruments not traded in active markets is determined using valuation techniques. These valuation techniques maximize the use of observable market data and minimize the use of entity specific estimates (All significant inputs to the fair value measurement is observable)

Level 3 -Valuation techniques for one or more significant inputs to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

NOTES TO THE FINANCIAL STATEMENTS

2.3 Revenue Recognition:

Revenue is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group is entitled in exchange for those goods or services, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment.

Revenue from rendering of services is recognised with reference to the stage of completion determined based on estimate of work performed, and when the outcome of the transaction can be estimated reliably.

Dividends:

Dividend income is recognised when the Group's right to receive the payment is established, it is probable that the economic benefits associated with the dividend will flow to the entity and the amount of dividend can be measured reliably. This is generally when the shareholder approve the dividend.

Interest Income:

For all debt instruments measured at amortised cost, interest income is recognised on time proportion basis, taking into account the amount outstanding and effective interest rate.

Rental Income:

Rental income arising from operating leases is accounted for on a straight-line basis over the lease terms and is included in Other income in the statement of profit and loss.

2.4. Financial Assets

Classification

The Group classifies its financial assets in the following categories:

- Those to be measured subsequently at fair value (either through comprehensive income or through statement of profit and loss), and
- Those measured at amortised cost

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flow.

NOTES TO THE FINANCIAL STATEMENTS

Initial Measurement

At Initial recognition, the group measures a financial asset at its fair value plus (in the case of financial asset not a fair value through profit or loss) transaction cost that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the statement of profit and loss.

Subsequent Measurement

Financial Asset measured at Amortised Cost (AC)

A financial asset is measured at amortised cost if it is held within a Group's business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method.

Financial assets at fair value through other comprehensive income: (FVTOCI)

Financial assets are subsequently measured at fair value through other comprehensive income if these financial assets are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and the interest on the principal outstanding.

Financial assets at Fair value through profit or loss: (FVTPL)

Any financial asset not subsequently measured at amortized cost or at fair value through other comprehensive income, is subsequently measured at fair value through profit or loss. Financial assets falling in this category are measured at fair value and all changes are recognized in the Statement of Profit and Loss.

2.5. Financial Liabilities

Initial Recognition

All financial liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition.

NOTES TO THE FINANCIAL STATEMENTS

Subsequent Measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

De-Recognition

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset.

A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

Impairment of Financial Assets

The Group applies the Expected Credit Loss (ECL) model for recognizing impairment losses if any on financial assets.

12 months ECL represents the expected default events on the financial asset that are possible within 12 months after the reporting date.

Where the credit risk on the financial assets has not increased significantly since initial recognition, the loss is measured at an amount equal to 12 months ECL.

Where the credit risk on the financial assets has increased significantly since initial recognition, the loss is measured at an amount equal to the lifetime expected credit loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet when the Group has a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

Derivative financial instruments

The Group is exposed to certain risk relating to its ongoing business operations. The primary risks managed using derivative instruments are foreign currency risk.

To mitigate the risk of changes in foreign exchange rates on forecasted cash flows denominated in foreign currencies, the Group holds derivative financial instruments such as foreign exchange forward contracts. The counterparty for these contracts is generally a bank. Derivatives are recognized and measured at fair value. Attributable transaction costs are recognized in the Statement of Profit and Loss.

NOTES TO THE FINANCIAL STATEMENTS

Cash flow hedges: Changes in the fair value of the derivative hedging instrument designated as a cash flow hedge are recognized in other comprehensive income and presented within equity in the cash flow hedging reserve to the extent that the hedge is effective.

To the extent that the hedge is ineffective, changes in fair value are recognized in the statement of profit and loss.

2.6. Leases

The Group's lease asset classes primarily consist of leases for land and buildings. The Group assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether: (i) the contract involves the use of an identified asset (ii) the Group has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Group has the right to direct the use of the asset.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Group changes its assessment if whether it will exercise an extension or a termination option.

NOTES TO THE FINANCIAL STATEMENTS

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

2.7. Employee Benefits

SHORT TERM EMPLOYEE BENEFITS

As per the employment policy of the Group, short term employee benefits for services rendered by employees are recognized during the period when the services are rendered.

POST EMPLOYMENT BENEFITS

a. Defined Contribution plans

i. Superannuation

The Group contributes to the Superannuation fund, which is managed by the Life Insurance Corporation of India (LIC). The contributions are charged to the Statement of Profit and Loss.

ii. Provident Fund

The Provident Fund contributions are made to the government administered Provident Fund and Employees' Pension Scheme under the Employees Provident Fund Act and to Employees' State Insurance Schemes on behalf of its employees. The contributions are charged to Statement of Profit and Loss.

b. Defined benefit plans

Gratuity

The Group provides a lump sum payment to eligible employees, at retirement or resignation of employment based on the last drawn salary and years of employment with the Group as per the provisions of the Payment of Gratuity Act, 1972. The Group makes contributions to a gratuity fund administered by trustees and managed by LIC of India.

The liability or asset recognized in the Balance Sheet in respect of a defined gratuity plan is the present value of defined benefit obligation at the end of the reporting period less the fair value of plan assets. Gratuity liability is a defined benefit obligation and is recorded based on actuarial valuation using the projected unit credit method made at the end of the year.

The present value of defined benefit obligation is determined by discounting the estimated future cash out flows by reference to market yields at the end of the reporting period on

NOTES TO THE FINANCIAL STATEMENTS

government bonds that have terms approximating to the terms of the related obligation. The gratuity liability and net periodic gratuity cost is actuarially determined after considering discount rates, expected long term return on plan assets and increase in compensation levels. Re-measurement gains or losses arising from Experience Adjustments and changes in actuarial assumptions are recognized in the period they occur, directly in the Other Comprehensive Income. They are included in the statement of changes in equity and in the Balance Sheet. Re-measurements comprising actuarial gains or losses and return on plan assets (excluding amounts included in net interest on the net defined benefit liability) are not reclassified to Statement of Profit or Loss in subsequent periods.

Changes in present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in the Statement of Profit and Loss.

c. Other Long Term Employee Benefits

i) The estimated liability in respect of other long term benefits like Employee Assured Bonus Scheme has been provided on the basis of actuarial valuation.

ii) Leave Encashment:

The Group contributes to a staff leave encashment scheme managed by SBI Life Insurance Company Limited. The Group accounts its liability based on an actuarial valuation, as at the Balance Sheet date, using the Projected Unit Credit method.

2.8 Income Taxes

Income-tax expense comprises current tax (amount of tax for the period determined in accordance with The Income Tax law) and deferred tax charge or credit (reflecting the tax effects of temporary differences between tax bases of assets and liabilities and their carrying amounts in the financial statements). Taxes are recognized in the Statement of Profit and Loss except to the extent it relates to items directly recognized in equity or in the Other Comprehensive Income.

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961. Current tax comprises the tax payable on the taxable income or loss for the year and any adjustment to the tax payable in respect

NOTES TO THE FINANCIAL STATEMENTS

of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognized amounts; and
- b) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable income.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilized.

Deferred tax assets are reviewed at each reporting date and based on management's judgement, are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Unrecognized deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax assets and liabilities are offset only if the Group:

- a) has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

Current and Deferred tax for the year- OCI

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the

NOTES TO THE FINANCIAL STATEMENTS

current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.9. Property, plant and equipment

The property plant and equipment are the assets held for the use in the supply of services

Property, plant and equipment's are stated in the balance sheet at cost (net of duty/ tax credit availed) less accumulated depreciation and accumulated impairment losses.

Cost of acquisition is inclusive of freight, non-refundable duties & taxes and other directly attributable cost of bringing the asset to its working condition for the intended use.

Freehold land is not depreciated.

An item is recognised as property plant and equipment if and only if it is probable that future economic benefits associated with the item will flow to the Group and its costs can be measured reliably

Subsequent expenditure is added to the carrying amount or recognised as separate asset only when it is probable that future economic benefits associated with the item will flow to the Group and the cost can be measured reliably.

Depreciation commences when the assets are ready for their intended use. Where the property plant and equipment is not ready for its intended use as on the balance sheet date it is disclosed as capital work in progress

For the Parent and its subsidiary, Depreciation is recognised to write off, the cost of assets less their residual values over their useful lives, using the written down value method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

All the Associate companies except Turbo Energy Private Limited provide depreciation on Property, Plant & Equipment on straight-line basis on the useful life of the asset as provided in the schedule II of Companies Act 2013

Estimated useful lives of the assets, based on technical assessment, which are different in certain cases from those prescribed in Schedule II to the Act, are as follows:

(in years)

NOTES TO THE FINANCIAL STATEMENTS

Assets	Own
Office equipment	8
Computer (included in Plant & Equipment)	
End user services	7
Servers and network	10
Vehicles	5
Electrical Equipment	15

The property plant and equipment with definite life are reviewed for impairment whenever the events or changes indicate that their carrying value may not be recoverable.

Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life.

An item of the property plant equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of the item of property plant equipment is determined as the difference between the sale proceeds and carrying amount of the asset and is recognised in profit and loss.

2.10 Investment Property

Properties held to earn rental income or for capital appreciation or both and that is not occupied by the Group is classified as Investment Property.

It is measured initially at cost of acquisition including transaction costs, borrowing cost and other directly attributable cost in bringing the asset to its working condition for its intended use.

Subsequent expenditure is capitalized to the asset carrying amount only when it is probable that the future economic benefit associated with the expenditure will flow to the Group and cost can be measured reliably.

The fair value of investment property has been determined by property valuer, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

Sundaram Finance Holdings Limited

NOTES TO THE FINANCIAL STATEMENTS

Depreciation is provided on written down value method by adopting useful life prescribed under schedule II to the Companies Act, 2013 after retaining 5% of Original cost as residual value for Buildings.

Items of investment property	Useful Lives(Total)
Freehold Land	N.A
Building	30 years

Though the Group measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the statement of profit and loss in the period of derecognition.

2.11. Intangible assets

Intangible assets are identified non-monetary assets without physical existence. Intangible assets represent Computer software whose cost is amortised over their expected useful life on a straight-line basis.

Intangible assets with finite useful lives that are acquired separately are capitalised and carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over the estimated useful life of the asset.

Intangible assets are recognised in books only when it is probable that future economic benefits associated with the asset will flow to the group and the cost can be measured reliably.

The cost of the intangible asset shall include the purchase price, including non-refundable duties and taxes, all the directly attributable costs to bring the intangible to the present location, working condition and intended use.

2.12. Impairment of Assets

The carrying amounts of assets are reviewed at each balance sheet date to ascertain impairment based on internal / external factors. An impairment loss is recognised when the carrying amount of

↓

NOTES TO THE FINANCIAL STATEMENTS

an asset exceeds its recoverable amount. The recoverable amount is the higher of the net selling price of the assets and their value in use.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

2.13. Foreign Currency Transactions

Functional and Presentation Currency:

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the entity operates (i.e the "functional currency"). The functional currency of Group is the Indian Rupee. These Consolidated financial statements are presented in Indian rupee.

Foreign Currency Transactions and balances:

Transactions in foreign currency are accounted at the exchange rates prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets, are capitalized as cost of assets.

Non-monetary items that are measured in terms of historical cost in a foreign currency are recorded using the exchange rates at the date of the transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or Statement of Profit and Loss are also recognised in OCI or Statement of Profit and Loss, respectively).

2.14. Cash Flow Statement

Statement of cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or

NOTES TO THE FINANCIAL STATEMENTS

future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

2.15. Provisions and Contingent Liabilities

Provisions are recognized when the enterprise has a present legal or constructive obligation, as a result of a past event, and it is probable that the Group will be required to settle the obligation for which a reliable estimate can be made.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

A Contingent liability is

- (i) a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group (or)
- (ii) a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

A contingent liability should be disclosed, if the possibility of an outflow of resources embodying economic benefits is not remote.

2.16 Earnings Per Share

The basic earnings per share has been computed by dividing the net income attributable to equity shareholders by weighted average number of equity shares outstanding during the year.

The diluted earnings per share has been computed using weighted average number of shares adjusted for effects of all potentially dilutive equity shares.

2.17 Cash and Cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short-term, highly liquid

NOTES TO THE FINANCIAL STATEMENTS

investments with original maturities of three months or less that are readily Convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

2.18 Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

3. Critical accounting judgments and key sources of estimation uncertainty

The preparation of consolidated financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the balance sheet and statement of profit and loss. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. The actual results may differ from these estimates. The management believes that the estimates used in preparation of the consolidated financial statements are prudent and reasonable. Any revision to the accounting estimates is recognised prospectively in the current and future periods.

Useful lives of Property Plant and Equipment / Intangible Assets

Property, Plant and Equipment / Intangible Assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Group's historical experience with similar assets and takes into account anticipated technological changes. The depreciation / amortisation for future periods is revised if there are significant changes from previous estimates.

Impairment of Financial Assets

The impairment provisions for Financial Assets are based on assumptions about risk of default and expected cash loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Measurement of Fair Value**Fair Value Hierarchy**

The fair value of investment property has been determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

The fair value measurement for all of the investment property has been categorised as a Level 3 fair value based on the inputs to the valuation technique used.

Valuation Techniques

The Group follows discounted cash flows technique. The valuation model considers the present value of net cash flows to be generated from the property, taking into account the expected rental growth rate, vacant periods, occupancy rate, lease incentive costs such as rent-free periods and other costs not paid by tenants. The expected net cash flows are discounted using risk-adjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary), tenant credit quality and lease terms.

Investment property comprises a number of commercial properties that are leased to third parties. No contingent rents are charged.

Fair Value hierarchy

The fair value hierarchy is based on inputs to

Level 1 hierarchy - Includes Financial Instruments measured using quoted prices in the active market.

Level 2 hierarchy - The Fair value of Financial Instruments that are not traded in an active market, is determined using valuation techniques which maximize the use of observable market data.

Level 3 hierarchy - Inputs are not based on observable market data. Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

B. Measurement of fair values

Financial instruments fair valued under Level 3 hierarchy are measured using Market multiples method.

The carrying amount of trade receivables, cash and cash equivalents, other financial assets, trade payables, borrowings and other financial liabilities are considered to be the fair value due to short term nature.

There are no transfers between level 1, level 2 and level 3 during the year

Note 28 : Financial Risk Management

The Group has exposure to the following risks arising from financial instruments:

- Credit risk ;
- Liquidity risk ; and
- Market risk

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

(a) Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Company regularly monitors the rolling forecasts and the actual cash flows to service the financial liabilities on a day-to-day basis through cash generation from business.

The following table shows the maturity analysis of the Group's financial liabilities based on contractually agreed undiscounted cash flows along with its carrying value as at the Balance sheet date.

Particulars	₹ in Lakhs	
	31 Mar 20	31 Mar 19
Trade payables	86.93	105.37
Other financial Liabilities	127.90	90.27

(b) Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and loans and advances.

(i) Trade receivables:

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer and the geography in which it operates. Concentration of credit risk with respect to trade receivables are limited as the customers are reviewed, assessed and monitored regularly on a monthly basis with pre-determined credit limits assessed based on their payment capacity. Our historical experience of collecting receivables demonstrates that credit risk is low.

The following table sets out the information about the credit quality of financial assets measured at amortised cost.

E. Principal Actuarial Assumptions [Expressed as weighted averages]

The estimates of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors like supply and demand in employment market. Amount for the current and previous financial year are as follows :

Particulars	31 Mar 20	31 Mar 19
Discount Rate	6.47%	7.36%
Salary Escalation	5.00%	6.00%
Attrition	10.00%	10.00%

(ii) Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

(₹ in Lakhs)

Gratuity	Change in assumption		Impact on defined benefit obligation			
			Increase in assumption		Decrease in assumption	
Details	31 Mar 20	31 Mar 19	31 Mar 20	31 Mar 19	31 Mar 20	31 Mar 19
Discount rate	0.50%	0.50%	-5.80	-5.06	6.09	5.32
Salary growth rate	0.50%	0.50%	6.14	5.36	-5.89	-5.15
Attrition rate	5.00%	5.00%	-0.43	-0.35	0.43	0.32
Mortality rate	5.00%	5.00%	0.02	0.01	-0.03	-0.02

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied when calculating the defined benefit liability recognised in the balance sheet.

(iii) Maturity profile of defined benefit obligation

(₹ in lakhs)

Particulars	31.03.2020	31.03.2019
Year 1	67.84	53.08
Year 2	36.91	33.86
Year 3	32.60	28.58
Year 4	38.11	25.79
Year 5	28.33	28.93
Next 5 years	87.33	78.81

(iv) Risk exposure

Through its defined benefit plans, the Group is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility: The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets underperform this yield, this will create a deficit. Most of the plan asset investments is in fixed income securities with high grades and in government securities. These are subject to interest rate risk and the fund manages interest rate risk with derivatives to minimise risk to an acceptable level. A portion of the funds are invested in equity securities and in alternative investments which have low correlation with equity securities. The equity securities are expected to earn a return in excess of the discount rate and contribute to the plan deficit. The Group has a risk management strategy where the aggregate amount of risk exposure on a portfolio level is maintained at a fixed range. Any deviations from the range are corrected by rebalancing the portfolio. The Group intends to maintain the above investment mix in the continuing years.

Changes in bond yield: A decrease in bond yields will increase plan liabilities, although this will be partially offset by an yields increase in the value of the plans' bond holdings.

Inflation risks: In the pension plans, the pensions in payment are not linked to inflation, so this is a less material risk.

Life expectancy: The pension plan obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan liabilities. This is particularly significant where inflationary increases result in higher sensitivity to changes in life expectancy.

(v) The expected contribution to the plan for the next year amounts to Rs.5.19 lakhs

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the consolidated financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined the matters described below to be the key audit matters to be communicated in our report.

Information Other than the Consolidated Financial Statements and Auditor's Report thereon

The Holding Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in Management Discussion and Analysis; Board's Report including Annexure and Corporate Governance Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in term of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance, consolidated changes in equity and consolidated cash flows of the Group including its Associates in accordance with Ind AS and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group and of its associates are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associates are responsible for assessing the ability of the Group and of its associates to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associates is also responsible for overseeing the financial reporting process of the Group and of its associates.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- (i) Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (ii) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Group and its associates which are companies incorporated in India, has adequate internal financial controls system in place and the operating effectiveness of such controls.
- (iii) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- (iv) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its associates to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and its associates to cease to continue as a going concern.
- (v) Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial

statements represent the underlying transactions and events in a manner that achieves fair presentation.

- (vi) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its associates to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annexure - "A" referred to in Clause (f) under 'Report on Other Legal and Regulatory Requirements' section of our audit report of even date to the members of Sundaram Finance Holdings Limited ("the Holding Company") on the Consolidated Financial Statements of the Company for the year ended 31st March, 2019

In conjunction with our audit of the Consolidated Financial Statements of the Holding Company as of and for the year ended 31st March 2019, we have audited the internal financial controls over the financial reporting of Sundaram Finance Holdings Limited ("the Holding Company") and its subsidiary and associate companies, which are companies incorporated in India as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company, its subsidiary companies and associate companies which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by these entities considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over financial reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding company, its subsidiary companies and associate companies, which are companies incorporated in India based on our audit.

We conducted our audit in accordance with the Guidance Note and the Standards on Auditing prescribed under sections 143(10) of the Act to the extent applicable to an audit of internal financial controls. The Guidance Note and those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal controls based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by other auditors in terms of their report too in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of aforesaid entities.

Meaning of Internal Financial Controls Over Financial Reporting

A Company's internal financial controls over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that:

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
3. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us the Holding company, its subsidiary companies and its associate companies, which are companies incorporated in India, have in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31,2019 based on, the internal control over financial reporting criteria established by these entities considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial reporting issued by the ICAI.

Other Matters

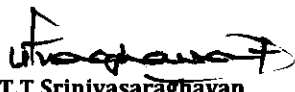

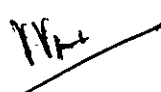

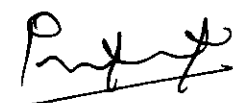

Our aforesaid report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting in so far as it relates to its subsidiary companies and associate companies, which are incorporated in India, is based on the reports of the auditors of such companies.

2.2 Measurement of fair values

The Group's accounting policies and disclosures require the measurement of financial assets and liabilities at fair values. The Group has established policies and procedures with respect to measurement of fair values.

The Group classifies the fair value of its financial instruments in the following hierarchy, based on the inputs used in their valuation:

Level 1 - The fair value of financial instruments traded in active markets is based on quoted (unadjusted) market prices at the end of the reporting period.

Level 2 - The fair valuation of instruments not traded in active markets is determined based on observable market data and by using valuation techniques.

NOTES TO THE FINANCIAL STATEMENTS

Level 3 – Where one or more of the significant inputs are not from observable market data.

Revenue Recognition:

Revenue is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the group is entitled in exchange for those goods or services, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment.

Revenue from rendering of services is recognised with reference to the stage of completion determined based on estimate of work performed, and when the outcome of the transaction can be estimated reliably.

Dividends:

Dividend income is recognised when the Group's right to receive the payment is established, it is probable that the economic benefits associated with the dividend will flow to the entity and the amount of dividend can be measured reliably. This is generally when the shareholder approves the dividend.

Interest Income:

For all debt instruments measured at amortised cost, interest income is recognised on time proportion basis, taking into account the amount outstanding and effective interest rate.

Rental Income:

Rental income arising from operating leases is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit and loss due to its operating nature.

2.4. Financial Assets

Initial Measurement

At Initial recognition, the group measures a financial asset at its fair value plus (in the case of financial asset not a fair value through profit or loss) transaction cost that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the statement of profit and loss.

Subsequent Measurement

Financial Asset measured at Amortised Cost (AC)

A financial asset is measured at amortised cost if it is held within a Group's business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method.

Financial assets at fair value through other comprehensive income: (FVTOCI)

Financial assets are subsequently measured at fair value through other comprehensive income if these financial assets are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on principal and the interest on the principal outstanding.

Financial assets at Fair value through profit or loss: (FVTPL)

Any financial asset not subsequently measured at amortized cost or at fair value through other comprehensive income, is subsequently measured at fair value through profit or loss. Financial assets falling in this category are measured at fair value and all changes are recognized in the Statement of Profit and Loss.

2.5. Financial Liabilities

Initial Recognition

All financial liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition.

Subsequent Measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet

NOTES TO THE FINANCIAL STATEMENTS

date, the carrying amounts approximate fair value due to the short maturity of these instruments.

De-Recognition

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset.

A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

Impairment of Financial Assets

The Group applies the Expected Credit Loss (ECL) model for recognizing impairment losses if any on financial assets.

12 months ECL represents the expected default events on the financial asset that are possible within 12 months after the reporting date.

Where the credit risk on the financial assets has not increased significantly since initial recognition, the loss is measured at an amount equal to 12 months ECL.

Where the credit risk on the financial assets has increased significantly since initial recognition, the loss is measured at an amount equal to the lifetime expected credit loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet when the Group has a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

Derivative financial instruments

The Group is exposed to certain risk relating to its ongoing business operations. The primary risks managed using derivative instruments are foreign currency risk.

To mitigate the risk of changes in foreign exchange rates on forecasted cash flows denominated in foreign currencies, the Group holds derivative financial instruments such as foreign exchange forward contracts. The counterparty for these contracts is generally a bank.

NOTES TO THE FINANCIAL STATEMENTS

Derivatives are recognized and measured at fair value. Attributable transaction costs are recognized in the Statement of Profit and Loss.

Cash flow hedges: Changes in the fair value of the derivative hedging instrument designated as a cash flow hedge are recognized in other comprehensive income and presented within equity in the cash flow hedging reserve to the extent that the hedge is effective.

To the extent that the hedge is ineffective, changes in fair value are recognized in the statement of profit and loss.

2.6. Leases

The Group as lessee

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

2.7. Employee Benefits

SHORT TERM EMPLOYEE BENEFITS

As per the employment policy of the Group, short term employee benefits for services rendered by employees are recognized during the period when the services are rendered.

POST EMPLOYMENT BENEFITS

The Group makes contributions to a gratuity fund administered by trustees and managed by LIC of India.

The liability or asset recognized in the Balance Sheet in respect of a defined gratuity plan is the present value of defined benefit obligation at the end of the reporting period less the fair value of plan assets. Gratuity liability is a defined benefit obligation and is recorded based on actuarial valuation using the projected unit credit method made at the end of the year.

The present value of defined benefit obligation is determined by discounting the estimated future cash out flows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The gratuity liability and net periodic gratuity cost is actuarially determined after considering discount rates, expected long term return on plan assets and increase in compensation levels. Re-measurement gains or losses arising from Experience Adjustments and changes in actuarial assumptions are recognized in the period they occur, directly in the Other Comprehensive Income. They are included in the statement of changes in equity and in the Balance Sheet. Re-measurements comprising actuarial gains or losses and return on plan assets (excluding amounts included in net interest on the net defined benefit liability) are not reclassified to Statement of Profit or Loss in subsequent periods.

Changes in present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in the Statement of Profit and Loss.

d. Other Long Term Employee Benefits

NOTES TO THE FINANCIAL STATEMENTS

- i) The estimated liability in respect of other long term benefits like Employee Assured Bonus Scheme has been provided on the basis of actuarial valuation.

- ii) Leave Encashment:

Taxes are recognized in the Statement of Profit and Loss except to the extent it relates to items directly recognized in equity or in the Other Comprehensive Income.

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961. Current tax comprises the tax payable on the taxable income or loss for the year and any adjustment to the tax payable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognized amounts; and
- b) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable income.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the

NOTES TO THE FINANCIAL STATEMENTS

carrying amount of its assets and liabilities. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilized.

Deferred tax assets are reviewed at each reporting date and based on management's judgement, are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Unrecognized deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax assets and liabilities are offset only if the Group:

- a) has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

Current and Deferred tax for the year- OCI

An item is recognised as property plant and equipment if and only if it is probable that future economic benefits associated with the item will flow to the Group and its costs can be measured reliably

Sundaram Finance Holdings Limited

NOTES TO THE FINANCIAL STATEMENTS

Subsequent expenditure is added to the carrying amount or recognised as separate asset only when it is probable that future economic benefits associated with the item will flow to the Group and the cost can be measured reliably.

Depreciation commences when the assets are ready for their intended use. Where the property plant and equipment is not ready for its intended use as on the balance sheet date it is disclosed as capital work in progress

For the Group, Depreciation is recognised to write off, the cost of assets less their residual values over their useful lives, using the written down value method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

All the Associate companies except Turbo Energy Private Limited provide depreciation on Property, Plant & Equipment on straight-line basis on the useful life of the asset as provided in the schedule II of Companies Act 2013

Estimated useful lives of the assets, based on technical assessment, which are different in certain cases from those prescribed in Schedule II to the Act, are as follows:

Assets (Own)	(in years)
Office equipment	8
Computer (included in Plant and Equipment)	7
End user services	10
Servers and network	
Vehicles	5
Electrical Equipment	15

The property plant and equipment with definite life are reviewed for impairment whenever the events or changes indicate that their carrying value may not be recoverable.

Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life.

NOTES TO THE FINANCIAL STATEMENTS

An item of the property plant equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of the item of property plant equipment is determined as the difference between the sale proceeds and carrying amount of the asset and is recognised in profit and loss.

2.10 Investment Property

Properties held to earn rental income or for capital appreciation or both and that is not occupied by the Group is classified as Investment Property.

It is measured initially at cost of acquisition including transaction costs, borrowing cost and other directly attributable cost in bringing the asset to its working condition for its intended use.

Subsequent expenditure is capitalized to the asset carrying amount only when it is probable that the future economic benefit associated with the expenditure will flow to the Group.

Depreciation is provided on written down value method by adopting useful life prescribed under schedule II to the Companies Act, 2013 after retaining 5% of Original cost as residual value for Buildings.

Though the Group measures investment property using cost-based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined by property valuer, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

Investment properties are derecognised either when they have been disposed off or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the statement of profit and loss in the period of derecognition.

2.11. Intangible assets

Intangible assets are identified non-monetary assets without physical existence. Intangible assets represent Computer software whose cost is amortised over their expected useful life on a straight-line basis.

NOTES TO THE FINANCIAL STATEMENTS

Intangible assets with finite useful lives that are acquired separately are capitalised and carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over the estimated useful life of the asset.

Intangible assets are recognised in books only when it is probable that future economic benefits associated with the asset will flow to the Group and the cost can be measured reliably.

The cost of the intangible asset shall include the purchase price, including non-refundable duties and taxes, all the directly attributable costs to bring the intangible to the present location, working condition and intended use.

2.12. Impairment of Assets

The carrying amounts of assets are reviewed at each balance sheet date to ascertain impairment based on internal / external factors. An impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of the net selling price of the assets and their value in use.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

2.13. Foreign Currency Transactions

Functional and Presentation Currency:

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the entity operates (i.e. the “functional currency”). The functional currency of the Group is Indian Rupee. These Consolidated financial statements are presented in Indian rupee.

Foreign Currency Transactions and balances:

Transactions in foreign currency are accounted at the exchange rates prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets, are capitalized as cost of assets.

NOTES TO THE FINANCIAL STATEMENTS

Non-monetary items that are measured in terms of historical cost in a foreign currency are recorded using the exchange rates at the date of the transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or Statement of Profit and Loss are also recognised in OCI or Statement of Profit and Loss, respectively).

2.14. Cash Flow Statement

Statement of cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

2.15. Provisions and Contingent Liabilities

Provisions are recognized when the enterprise has a present legal or constructive obligation, as a result of a past event, and it is probable that the Group will be required to settle the obligation for which a reliable estimate can be made.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

A Contingent liability is

- (i) a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group (or)
- (ii) a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

NOTES TO THE FINANCIAL STATEMENTS

A contingent liability should be disclosed, if the possibility of an outflow of resources embodying economic benefits is not remote.

2.16 Earnings Per Share

The basic earnings per share has been computed by dividing the net income attributable to equity shareholders by weighted average number of shares outstanding during the year.

The diluted earnings per share has been computed using weighted average number of shares adjusted for effects of all potentially dilutive equity shares.

3. Approach on exemptions under Ind AS 101 First Time Adoption of Indian Accounting Standards (Ind AS)

The Group has elected to take the following exemptions as per Ind AS 101 to facilitate transition from Indian GAAP ("previous GAAP") to Ind AS.

3.1 Deemed cost for property, plant and equipment, intangible assets and investment property

The Group has opted to adopt the carrying amount determined in accordance with the previous GAAP for property plant and equipment, intangible assets and investment property as deemed cost on transition.

3.2 Derecognition of financial assets and financial liabilities

The Group has opted to apply derecognition requirements as per Ind AS 109 prospectively for transactions on or after 1 April 2017.

3.3 Deemed cost for investments in Subsidiaries and Associates

The Group has opted to apply the exemption of considering previous GAAP carrying amounts as deemed cost under Ind AS for its investments in Subsidiaries and Associates.

3.4 Past Business Combinations

The Group has elected not to apply Ind AS 103 – Business Combinations retrospectively to past business combinations that occurred before the transition date.

3.5 Estimates

On assessment of the estimates made under the Previous GAAP financial statements, the Group has concluded that there is no necessity to revise the estimates under Ind AS, as

NOTES TO THE FINANCIAL STATEMENTS

there is no objective evidence of an error in those estimates. However, estimates that were required under Ind AS but not required under Previous GAAP are made by the Group for the relevant reporting dates reflecting conditions existing as at that date.

3.6 Previous GAAP figures have been reclassified / regrouped wherever necessary to confirm with financial statements prepared under Ind AS.

4. Critical accounting judgments and key sources of estimation uncertainty

The preparation of consolidated financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the balance sheet and statement of profit and loss. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. The actual results may differ from these estimates. The Management believes that the estimates used in preparation of the consolidated financial statements are prudent and reasonable. Any revision to the accounting estimates is recognised prospectively in the current and future periods.

Useful lives of Property Plant and Equipment / Intangible Assets

Property, Plant and Equipment / Intangible Assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value.

Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Group's historical experience with similar assets and take into account anticipated technological changes. The depreciation / amortisation for future periods is revised if there are significant changes from previous estimates.

Impairment of Financial Assets

The impairment provisions for Financial Assets are based on assumptions about risk of default and expected cash loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Measurement of Fair Value**Fair Value Hierarchy**

The fair value of investment property has been determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

The fair value measurement for all of the investment property has been categorised as a Level 3 fair value based on the inputs to the valuation technique used.

Valuation Techniques

The Group follows discounted cash flows technique. The valuation model considers the present value of net cash flows to be generated from the property, taking into account the expected rental growth rate, vacant periods, occupancy rate, lease incentive costs such as rent-free periods and other costs not paid by tenants. The expected net cash flows are discounted using risk-adjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary), tenant credit quality and lease terms.

Investment property comprises a number of commercial properties that are leased to third parties. No contingent rents are charged.

Fair Value hierarchy

The fair value hierarchy is based on inputs to

Level 1 hierarchy - Includes Financial Instruments measured using quoted prices in the active market.

Level 2 hierarchy - The Fair value of Financial Instruments that are not traded in an active market, is determined using valuation techniques which maximize the use of observable market data.

Level 3 hierarchy - Inputs are not based on observable market data. Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

B. Measurement of fair values

Financial instruments fair valued under Level 3 hierarchy are measured using Market multiples method.

The carrying amount of trade receivables, cash and cash equivalents, other financial assets, trade payables, borrowings and other financial liabilities are considered to be the fair value due to short term nature.

There are no transfers between level 1, level 2 and level 3 during the year.

Note 29 : Financial Risk Management

The Group has exposure to the following risks arising from financial instruments:

- Credit risk ;
- Liquidity risk ; and
- Market risk

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

(a) Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group regularly monitors the rolling forecasts and the actual cash flows to service the financial liabilities on a day-to-day basis through cash generation from business and by having adequate banking facilities.

The following table shows the maturity analysis of the Group's financial liabilities based on contractually agreed undiscounted cash flows along with its carrying value as at the Balance sheet date.

(b) Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and loans and advances.

(i) Trade receivables:

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer and the geography in which it operates. Concentration of credit risk with respect to trade receivables are limited as the customers are reviewed, assessed and monitored regularly on a monthly basis with pre-determined credit limits assessed based on their payment capacity. Our historical experience of collecting receivables demonstrates that credit risk is low.

The following table sets out the information about the credit quality of financial assets measured at amortised cost.

The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

E. Principal Actuarial Assumptions [Expressed as weighted averages]

The estimates of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors like supply and demand in employment market. Amount for the current and previous four years are as follows :

Particulars	31 Mar 19	31 Mar 18
Discount Rate	7.36%	7.74%
Salary Escalation	6.00%	5.00%
Attrition	10.00%	10.00%

(ii) Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Gratuity Details	Change in assumption		Impact on defined benefit obligation			
			Increase in assumption		Decrease in assumption	
	31 Mar 19	31 Mar 18	31 Mar 19	31 Mar 18	31 Mar 19	31 Mar 18
Discount rate	0.50%	0.50%	5.06	3.71	5.32	3.91
Salary growth rate	0.50%	0.50%	5.36	3.98	5.15	3.82
Attrition rate	5.00%	5.00%	0.63	0.65	0.64	0.66
Mortality rate	5.00%	5.00%	0.01	0.03	0.02	0.03

*The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied when calculating the defined benefit liability recognised in the balance sheet.

(iii) Maturity profile of defined benefit obligation

Particulars	₹ in lakhs	
	31.03.2019	31.03.2018
Year 1	53.08	39.75
Year 2	33.86	39.41
Year 3	28.58	23.06
Year 4	25.79	19.34
Year 5	28.93	17.54
Next 5 years	78.81	64.34

(iv) Risk exposure

Through its defined benefit plans, the Company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility: The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets underperform this yield, this will create a deficit. Most of the plan asset investments is in fixed income securities with high grades and in government securities. These are subject to interest rate risk and the fund manages interest rate risk with derivatives to minimise risk to an acceptable level. A portion of the funds are invested in equity securities and in alternative investments which have low correlation with equity securities. The equity securities are expected to earn a return in excess of the discount rate and contribute to the plan deficit. The Company has a risk management strategy where the aggregate amount of risk exposure on a portfolio level is maintained at a fixed range. Any deviations from the range are corrected by rebalancing the portfolio. The Company intends to maintain the above investment mix in the continuing years.

Changes in bond yield: A decrease in bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.

Inflation risks: In the pension plans, the pensions in payment are not linked to inflation, so this is a less material risk.

Life expectancy: The pension plan obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan liabilities. This is particularly significant where inflationary increases result in higher sensitivity to changes in life expectancy.

Leases in which a significant portion of risks and rewards of ownership are not transferred to the Group are called operating leases. Payments made under operating leases are charged to profit and loss in the year in which rent is actually incurred as the payments made to the lessor are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increase.

The company has entered into commercial leases for premises and equipment.

The obligations on long-term, non-cancellable operating leases payable as per the rentals stated in the respective agreements are as follows:

34h : Standard Issued but not effective**Ind AS 116**

The new standard has major impact for lessees. It eliminates the classification of leases as either finance leases or operating leases as required by Ind AS 17, Leases. It introduces a single on-balance sheet accounting model that is similar to current finance lease accounting model. The effective date for adoption of Ind AS 116 is annual periods beginning on or after April 1, 2019.

Ind AS 12

(i) MCA notified "Appendix C, Uncertainty over Income Tax Treatments" where acceptability of a particular tax treatment used by an entity or that it plans to use in its income tax filings and how an uncertain tax treatment affects the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates. The effective date for adoption of Ind AS 12 Appendix C is annual periods beginning on or after April 1, 2019

(ii) Recognition of the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events.

Ind AS 19

MCA notified the Inclusion of treatment of past service cost, or a gain or loss on settlement in case of plan amendment, curtailment or when settlement occurs.

14A. An entity also applies Ind AS 109 to other financial instruments in an associate or joint venture to which the equity method is not applied. These include long-term interests that, in substance, form part of the entity's net investment in an associate or joint venture

45K If an entity does not restate prior periods applying paragraph 45I, at the date of initial application of the amendments it shall recognise in the opening retained earnings (or other component of equity, as appropriate) any difference between:

- (a) the previous carrying amount of long-term interests described in paragraph 14A at that date; and
- (b) the carrying amount of those long-term interests at that date.

The Management is in the process of assessing the potential impact of all the above amendments in the Consolidated Financial statements

Report on Review of Unaudited Condensed Consolidated Interim Financial Statements

To the Board of Directors of Sundaram Finance Holdings Limited

We have reviewed the accompanying unaudited condensed consolidated interim financial statements of Sundaram Finance Holdings Limited (the "Company" / "Holding Company") its subsidiary (the Holding Company and its subsidiary together referred to as "the Group") and its Associates, which comprise the unaudited condensed consolidated interim balance sheet as at December 31, 2020, the unaudited condensed consolidated interim statement of profit and loss, including other comprehensive income, unaudited condensed consolidated interim cash flow statement and the unaudited condensed consolidated interim statement of changes in equity for the nine-months period ended and a summary of selected explanatory notes (together hereinafter referred to as, the "Unaudited Condensed Consolidated Interim Financial Statements"). The Unaudited Condensed Consolidated Interim Financial Statements have been prepared by the Company in connection with raising of funds in accordance with the provisions of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended ("SEBI ICDR Regulations").

Responsibilities of Management for the Unaudited Condensed Consolidated Interim Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these Unaudited Condensed Consolidated Interim Financial Statements in accordance with the requirements of Indian Accounting Standard (Ind AS 34) "Interim Financial Reporting" specified under section 133 of the Companies Act, 2013 (the "Act"), read with the Companies (Indian Accounting Standards) Rules, 2015, as amended and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial control that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Unaudited Condensed Consolidated Interim Financial Statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Unaudited Condensed Consolidated Interim Financial Statements

We conducted our review of the Unaudited Condensed Consolidated Interim Financial Statements in accordance with the Standard on Review Engagements (SRE) 2410 "*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*", issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing specified under section 143(10) of the Act and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

The Unaudited Condensed Consolidated Interim Financial Statements include the results of the following entities:

Subsidiary - Sundaram Business Services Limited

Associates:

1. Axles India Limited
2. Turbo Energy Private Limited
3. Transenergy Limited
4. Sundaram Dynacast Private Limited
5. Sundaram Hydraulics Limited
6. Flometallic India Private Limited
7. Dunes Oman LLC (FZC)
8. Wheels India Limited
9. Mind S.r.l.

Conclusion

Based on our review conducted as above and based on the consideration of the review reports of other auditors, nothing has come to our attention that causes us to believe that the accompanying Unaudited Condensed Consolidated Interim Financial Statements are not prepared, in all material respects, in accordance with requirements of Ind AS 34 as specified under Section 133 of the Act, read with relevant rules issued thereunder and other accounting principles generally accepted in India.

Emphasis of Matter

We draw your attention to Note 27(C) of the Unaudited Condensed Consolidated Interim Financial Statements wherein the Holding Company has disclosed impact assessment due to COVID-19 pandemic. As stated in the said note, the Management has assessed that the pandemic and consequent lockdown imposed by the Government till end of November 2020 have considerably impacted the business operations of the Holding Company's Associates, including their subsidiaries, which in turn, have impacted the financial results of the Holding Company, being an investment entity. The management is also of the view that though there have been signs of a reasonably healthy recovery in the automotive sector during the third quarter of the financial year pursuant to the phased release of the lock down, a full recovery to the levels of the pre-COVID era is unlikely in the near future. Considering the uncertainties prevailing in the economic conditions globally and in India, such impact assessment done by the Management of the Holding Company is highly dependent on the circumstances as they evolve in subsequent periods.

Our conclusion is not modified in respect of this matter.

Other matters

We did not review the Unaudited Condensed Interim Financial Statements and other financial information of the Subsidiary; whose Unaudited Condensed Interim Financial Statements and other financial information reflect total assets of Rs. 3474.95 Lakhs as at 31st December, 2020, total revenues of Rs. 2209.72 Lakhs, total net profit after tax of Rs. 264.09 Lakhs, total comprehensive income/(loss) of Rs. (-) 456.66 Lakhs and net cash inflows amounting to Rs. 70.91 Lakhs for the nine-months period then ended, as considered in the Unaudited Condensed Consolidated Interim Financial Statements, whose unaudited condensed interim financial information have been reviewed by other auditor and their report was provided to us by the management. The Unaudited Condensed Consolidated Interim Financial Statements also include the Group's share of net profit of Rs. 3121.56 Lakhs and total comprehensive income of Rs. 2,568.24 lakhs for the nine-months period ended 31st December 2020, as considered in the Unaudited Condensed Consolidated Interim Financial Statements, in respect of nine Associates, whose unaudited financial results have not been reviewed by us. These unaudited financial results have been reviewed by other auditors whose reports have been furnished to us by the Management during our review of unaudited consolidated financial results for the quarter ended December 31, 2020 and nine months period then ended being submitted by the Company pursuant to the requirement of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as modified by circular No. CIR/CFD/CMD1/44/2019 dated, March 29, 2019 (the "Circular").

Our conclusion on the Unaudited Condensed Consolidated Interim Financial Statements, in so far as it relates to the amounts and disclosures included in respect of the subsidiary and nine associates, is based solely on the reports of the other auditors.

Our conclusion is not modified in respect of the above matters.

Restriction on use

NOTES TO THE FINANCIAL STATEMENTS

The group combines the financial statements of the parent and its subsidiary line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset.

When the Group's share of losses in an equity accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the group does not recognise further losses, unless it has incurred obligation or made payments on behalf of the other entity

2.2 Measurement of fair values

The Group's accounting policies and disclosures require the measurement of financial assets and liabilities at fair values. The Group has established policies and procedures with respect to measurement of fair values.

The Group's policy on Fair Valuation is stated below.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole;

Level 1 - The fair value of financial instruments traded in active markets (such as publicly traded securities) is based on quoted (unadjusted) market prices at the end of the reporting period. The quoted market price used for financial assets held by the Group is the current bid price.

Level 2 - The fair valuation of instruments not traded in active markets is determined using valuation techniques. These valuation techniques maximize the use of observable market data and minimize the use of entity specific estimates (All significant inputs to the fair value measurement is observable)

Level 3 -Valuation techniques for one or more significant inputs to the fair value measurement is unobservable.

NOTES TO THE FINANCIAL STATEMENTS

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

2.3 Revenue Recognition:

Revenue is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group is entitled in exchange for those goods or services, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment.

Revenue from rendering of services is recognised with reference to the stage of completion determined based on estimate of work performed, and when the outcome of the transaction can be estimated reliably.

Dividends:

Dividend income is recognised when the Group's right to receive the payment is established, it is probable that the economic benefits associated with the dividend will flow to the entity and the amount of dividend can be measured reliably. This is generally when the shareholder approve the dividend.

Interest Income:

For all debt instruments measured at amortised cost, interest income is recognised on time proportion basis, taking into account the amount outstanding and effective interest rate.

Rental Income:

Rental income arising from operating leases is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit and loss due to its operating nature.

NOTES TO THE FINANCIAL STATEMENTS

2.4. Financial Assets

Classification

The Group classifies its financial assets in the following categories:

- Those to be measured subsequently at fair value (either through comprehensive income or through statement of profit and loss), and
- Those measured at amortised cost

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flow.

Initial Measurement

At Initial recognition, the group measures a financial asset at its fair value plus (in the case of financial asset not a fair value through profit or loss) transaction cost that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the statement of profit and loss.

Subsequent Measurement

Financial Asset measured at Amortised Cost (AC)

A financial asset is measured at amortised cost if it is held within a Group's business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method.

Financial assets at fair value through other comprehensive income: (FVTOCI)

Financial assets are subsequently measured at fair value through other comprehensive income if these financial assets are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on principal and the interest on the principal outstanding.

Financial assets at Fair value through profit or loss: (FVTPL)

Any financial asset not subsequently measured at amortized cost or at fair value through other comprehensive income, is subsequently measured at fair value through profit or loss. Financial

NOTES TO THE FINANCIAL STATEMENTS

assets falling in this category are measured at fair value and all changes are recognized in the Statement of Profit and Loss.

2.5. Financial Liabilities

Initial Recognition

All financial liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition.

Subsequent Measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

De-Recognition

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset.

A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

Impairment of Financial Assets

The Group applies the Expected Credit Loss (ECL) model for recognizing impairment losses if any on financial assets.

12 months ECL represents the expected default events on the financial asset that are possible within 12 months after the reporting date.

Where the credit risk on the financial assets has not increased significantly since initial recognition, the loss is measured at an amount equal to 12 months ECL.

Where the credit risk on the financial assets has increased significantly since initial recognition, the loss is measured at an amount equal to the lifetime expected credit loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet when the Group has a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

NOTES TO THE FINANCIAL STATEMENTS

Derivative financial instruments

The Group is exposed to certain risk relating to its ongoing business operations. The primary risks managed using derivative instruments are foreign currency risk.

To mitigate the risk of changes in foreign exchange rates on forecasted cash flows denominated in foreign currencies, the Group holds derivative financial instruments such as foreign exchange forward contracts. The counterparty for these contracts is generally a bank.

Derivatives are recognized and measured at fair value. Attributable transaction costs are recognized in the Statement of Profit and Loss.

Cash flow hedges: Changes in the fair value of the derivative hedging instrument designated as a cash flow hedge are recognized in other comprehensive income and presented within equity in the cash flow hedging reserve to the extent that the hedge is effective.

To the extent that the hedge is ineffective, changes in fair value are recognized in the statement of profit and loss.

2.6. Leases

The Group's lease asset classes primarily consist of leases for land and buildings. The Group assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether: (i) the contract involves the use of an identified asset (ii) the Group has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Group has the right to direct the use of the asset.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is

NOTES TO THE FINANCIAL STATEMENTS

determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Group changes its assessment if whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

2.7. Employee Benefits

SHORT TERM EMPLOYEE BENEFITS

As per the employment policy of the Group, short term employee benefits for services rendered by employees are recognized during the period when the services are rendered.

POST EMPLOYMENT BENEFITS

a. Defined Contribution plans

i. Superannuation

The Group contributes to the Superannuation fund, which is managed by the Life Insurance Corporation of India (LIC). The contributions are charged to the Statement of Profit and Loss.

ii. Provident Fund

The Provident Fund contributions are made to the government administered Provident Fund and Employees' Pension Scheme under the Employees Provident Fund Act and to Employees' State Insurance Schemes on behalf of its employees. The contributions are charged to Statement of Profit and Loss.

NOTES TO THE FINANCIAL STATEMENTS

b. Defined benefit plans

i. Gratuity

The Group provides a lump sum payment to eligible employees, at retirement or resignation of employment based on the last drawn salary and years of employment with the Group as per the provisions of the Payment of Gratuity Act, 1972. The Group makes contributions to a gratuity fund administered by trustees and managed by LIC of India.

The liability or asset recognized in the Balance Sheet in respect of a defined gratuity plan is the present value of defined benefit obligation at the end of the reporting period less the fair value of plan assets. Gratuity liability is a defined benefit obligation and is recorded based on actuarial valuation using the projected unit credit method made at the end of the year.

The present value of defined benefit obligation is determined by discounting the estimated future cash out flows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The gratuity liability and net periodic gratuity cost is actuarially determined after considering discount rates, expected long term return on plan assets and increase in compensation levels. Re-measurement gains or losses arising from Experience Adjustments and changes in actuarial assumptions are recognized in the period they occur, directly in the Other Comprehensive Income. They are included in the statement of changes in equity and in the Balance Sheet. Re-measurements comprising actuarial gains or losses and return on plan assets (excluding amounts included in net interest on the net defined benefit liability) are not reclassified to Statement of Profit or Loss in subsequent periods.

Changes in present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in the Statement of Profit and Loss.

c. Other Long Term Employee Benefits

i) The estimated liability in respect of other long term benefits like Employee Assured Bonus Scheme has been provided on the basis of actuarial valuation.

ii) Leave Encashment:

The Group contributes to a staff leave encashment scheme managed by SBI Life Insurance Company Limited. The Group accounts its liability based on an actuarial valuation, as at the Balance Sheet date, using the Projected Unit Credit method.

NOTES TO THE FINANCIAL STATEMENTS

2.8 Income Taxes

Income-tax expense comprises current tax (amount of tax for the period determined in accordance with The Income Tax law) and deferred tax charge or credit (reflecting the tax effects of temporary differences between tax bases of assets and liabilities and their carrying amounts in the financial statements). Taxes are recognized in the Statement of Profit and Loss except to the extent it relates to items directly recognized in equity or in the Other Comprehensive Income.

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961. Current tax comprises the tax payable on the taxable income or loss for the year and any adjustment to the tax payable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognized amounts; and
- b) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable income.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilized.

NOTES TO THE FINANCIAL STATEMENTS

Deferred tax assets are reviewed at each reporting date and based on management's judgement, are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Unrecognized deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax assets and liabilities are offset only if the Group:

- a) has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

Current and Deferred tax for the year- OCI

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.9. Property, plant and equipment

The property plant and equipment are the assets held for the use in the supply of services

Cost of acquisition is inclusive of freight, non-refundable duties & taxes and other directly attributable cost of bringing the asset to its working condition for the intended use.

Freehold land is not depreciated.

An item is recognised as property plant and equipment if and only if it is probable that future economic benefits associated with the item will flow to the Group and its costs can be measured reliably

Subsequent expenditure is added to the carrying amount or recognised as separate asset only when it is probable that future economic benefits associated with the item will flow to the Group and the cost can be measured reliably.

Sundaram Finance Holdings Limited

NOTES TO THE FINANCIAL STATEMENTS

Depreciation commences when the assets are ready for their intended use. Where the property plant and equipment is not ready for its intended use as on the balance sheet date it is disclosed as capital work in progress

For the Parent and its subsidiary, Depreciation is recognised to write off, the cost of assets less their residual values over their useful lives, using the written down value method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

All the Associate companies except Turbo Energy Private Limited provide depreciation on Property, Plant & Equipment on straight-line basis on the useful life of the asset as provided in the schedule II of Companies Act 2013

Estimated useful lives of the assets, based on technical assessment, which are different in certain cases from those prescribed in Schedule II to the Act, are as follows:

(in years)

Assets	Own
Office equipment	8
Computer (included in Plant & Equipment)	
End user services	7
Servers and network	10
Vehicles	5
Electrical Equipment	15

The property plant and equipment with definite life are reviewed for impairment whenever the events or changes indicate that their carrying value may not be recoverable.

Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life.

An item of the property plant equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the

Sundaram Finance Holdings Limited

NOTES TO THE FINANCIAL STATEMENTS

disposal or retirement of the item of property plant equipment is determined as the difference between the sale proceeds and carrying amount of the asset and is recognised in profit and loss.

2.10 Investment Property

Properties held to earn rental income or for capital appreciation or both and that is not occupied by the Group is classified as Investment Property.

It is measured initially at cost of acquisition including transaction costs, borrowing cost and other directly attributable cost in bringing the asset to its working condition for its intended use.

Subsequent expenditure is capitalized to the asset carrying amount only when it is probable that the future economic benefit associated with the expenditure will flow to the Group and cost can be measured reliably.

The fair value of investment property has been determined by property valuer, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

Depreciation is provided on written down value method by adopting useful life prescribed under schedule II to the Companies Act, 2013 after retaining 5% of Original cost as residual value for Buildings.

Items of Investment property	Useful Lives(Total)
------------------------------	---------------------

Freehold Land	N.A
Building	30 years

Though the Group measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the statement of profit and loss in the period of derecognition.

Sundaram Finance Holdings Limited

NOTES TO THE FINANCIAL STATEMENTS

2.11. Intangible assets

Intangible assets are identified non-monetary assets without physical existence. Intangible assets represent Computer software whose cost is amortised over their expected useful life on a straight-line basis.

Intangible assets with finite useful lives that are acquired separately are capitalised and carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over the estimated useful life of the asset.

Intangible assets are recognised in books only when it is probable that future economic benefits associated with the asset will flow to the group and the cost can be measured reliably.

The cost of the intangible asset shall include the purchase price, including non-refundable duties and taxes, all the directly attributable costs to bring the intangible to the present location, working condition and intended use.

2.12. Impairment of Assets

The carrying amounts of assets are reviewed at each balance sheet date to ascertain impairment based on internal / external factors. An impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of the net selling price of the assets and their value in use.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

2.13. Foreign Currency Transactions

Functional and Presentation Currency:

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the entity operates (i.e the "functional currency"). The functional currency of Group is the Indian Rupee. These Consolidated financial statements are presented in Indian rupee.

Foreign Currency Transactions and balances:

Transactions in foreign currency are accounted at the exchange rates prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

NOTES TO THE FINANCIAL STATEMENTS

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets, are capitalized as cost of assets.

Non-monetary items that are measured in terms of historical cost in a foreign currency are recorded using the exchange rates at the date of the transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or Statement of Profit and Loss are also recognised in OCI or Statement of Profit and Loss, respectively).

2.14. Cash Flow Statement

Statement of cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

2.15. Provisions and Contingent Liabilities

Provisions are recognized when the enterprise has a present legal or constructive obligation, as a result of a past event, and it is probable that the Group will be required to settle the obligation for which a reliable estimate can be made.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Sundaram Finance Holdings Limited

NOTES TO THE FINANCIAL STATEMENTS

A Contingent liability is

- (i) a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group (or)
- (ii) a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation, or a reliable estimate of the amount cannot be made.

A contingent liability should be disclosed, if the possibility of an outflow of resources embodying economic benefits is not remote.

2.16 Earnings Per Share

The basic earnings per share has been computed by dividing the net income attributable to equity shareholders by weighted average number of equity shares outstanding during the year.

The diluted earnings per share has been computed using weighted average number of shares adjusted for effects of all potentially dilutive equity shares.

2.17 Cash and Cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily Convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

2.18 Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

3. Critical accounting judgments and key sources of estimation uncertainty

The preparation of consolidated financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the balance sheet and statement of profit and loss. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. The actual results may differ from these estimates. The

NOTES TO THE FINANCIAL STATEMENTS

management believes that the estimates used in preparation of the consolidated financial statements are prudent and reasonable. Any revision to the accounting estimates is recognised prospectively in the current and future periods.

Useful lives of Property Plant and Equipment / Intangible Assets

Property, Plant and Equipment / Intangible Assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Group's historical experience with similar assets and takes into account anticipated technological changes. The depreciation / amortisation for future periods is revised if there are significant changes from previous estimates.

Impairment of Financial Assets

The impairment provisions for Financial Assets are based on assumptions about risk of default and expected cash loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

The worldwide disruption caused by the COVID-19 pandemic and the consequent lockdown imposed almost till end-November 2020 have considerably impacted the business operations of our associate companies, including their subsidiaries, which in turn, have impacted the financial results of the Company. Though there have been signs of a reasonably healthy recovery in the automotive sector during the third quarter of the financial year pursuant to the phased release of the lock down, a full recovery to the levels of the pre-COVID era is unlikely in the near term. The company will however continue to closely monitor any material changes to future economic conditions and take appropriate risk mitigation measures.

Independent Auditor's Review Report on Quarterly and Year to Date Unaudited Consolidated Financial Results of the Company Pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended)

To the Board of Directors of Sundaram Finance Holdings Limited

1. We have reviewed the accompanying Statement of Unaudited Consolidated Financial Results of Sundaram Finance Holdings Limited ("the Parent") and its Subsidiary (the Parent and its Subsidiary together referred to as "the Group"), and its share of the net profit after tax and total comprehensive income of its Associates for the quarter ended December 31, 2019 and year to date from April 1, 2019 to December 31, 2019 ("the Statement"), being submitted by the Parent pursuant to the requirement of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as modified by circular No. CIR/CFD/CMD1/44/2019 dated, March 29, 2019 (the "Circular"). Attention is drawn to the fact that the consolidated figures for the corresponding period April 1, 2018 to December 31, 2018, as reported in the statement have been approved by the Parent's Board of Directors, but have not been subjected to review by us.
2. This Statement, which is the responsibility of the Parent's Management and approved by the Parent's Board of Directors, has been prepared in accordance with the recognition and measurement principles as laid down in Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013, (the Act) and other accounting principles generally accepted in India. Our responsibility is to issue a report on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing specified under section 143(10) of the Act and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33 (8) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, to the extent applicable.

4. The statement includes the results of the following entities:

Subsidiary - Sundaram Business Services Limited

Associates:

1. Axles India Limited
2. Turbo Energy Private Limited
3. Transenergy Limited
4. Sundaram Dynacast Private Limited
5. Sundaram Hydraulics Limited
6. Flometallic India Private Limited
7. Dunes Oman LLC (FZC)

5. Based on our review conducted and procedures performed as stated in paragraph 3 above and based on the consideration of the review reports of other auditors referred to in paragraph 6 below, nothing has come to our attention that causes us to believe that the Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended, including the manner in which it is to be disclosed, or that it contains any material misstatement.

6. We did not review the interim financial results of the Subsidiary included in the unaudited consolidated financial results, whose interim financial results reflect total revenues of Rs.936.37 lakhs and Rs.2,801.15 lakhs, total net profit after tax of Rs.215.67 lakhs and Rs.297.51 lakhs, total comprehensive income of Rs.26.29 lakhs and Rs.125.22 lakhs for the quarter ended December 31,2019 and for the period from April 01, 2019 to December 31, 2019 respectively. These interim financial results have been reviewed by other auditors whose reports have been furnished to us by the Management and our conclusion on the statement, in so far as it relates to the amounts and disclosures included in respect of the Subsidiary and seven Associates are based solely on the reports of the other auditors and the procedures performed by us as stated in paragraph 3 above.

OVERVIEW

We are an automotive sector focused investment company with investments in 20 portfolio companies of which 15 companies are involved across the automotive manufacturing value chain. Our investments are focused in the automotive space, with current investments in portfolio companies engaged in various aspects of automotive manufacturing including axles, axle housing, wheels and suspension, fuel injection equipment, precision aluminium cast products, iron castings, spare parts and electrical equipment. Further, several of our portfolio companies are market leaders in their respective segments, such as Brakes India Private Limited, which is amongst the leading suppliers of braking systems in the personal vehicle segment, Wheels India Limited, which is a key player in steel rims/wheels manufacturing as well as a key supplier on air suspension systems, Turbo Energy Private Limited, which is one of the largest turbocharger manufacturers in the domestic market, catering to all major personal vehicle OEMs as well as commercial vehicle players, Axles India Limited, which is a prominent axle housing suppliers, Sundaram Clayton Limited, which is a leading aluminium die-casting company, especially in the commercial vehicle segment, Lucas TVS Limited, which is a key supplier of automotive electrical components such as alternators, starter motors and wiper motors and Delphi TVS Technologies Limited, one of the few large players in the fuel injection system market. (Source: ICRA Report) As per ICRA, Turbo Energy, Honeywell Turbo Technologies India Private Limited ("Honeywell") and Cummins Turbo Technologies Limited ("CTT") together accounted for over 90% of the domestic turbocharger requirement.

Our Company was incorporated on October 13, 1993, under the name of Sundaram Finance Securities Private Limited. Pursuant to a scheme of arrangement and amalgamation between our Promoter, our Company, and certain other transferor companies, approved by the National Company Law Tribunal by way of an order dated January 12, 2018, certain identified shared services from our Promoter and Sundaram BPO India Limited, and training services, non-core investments and identified immovable properties from our Promoter were transferred into and vested in our Company, as a going concern, with effect from April 1, 2016. Pursuant to an application dated September 17, 2020, we had applied for registration as a non-deposit taking non-banking finance company. Our application was returned by RBI vide their letter dated February 25, 2021, post which we sought a clarification from RBI vide our letter dated February 26, 2021.

We also provide business process outsourcing services in the nature of information technology enabled services in areas of accounting, insurance, banking, human resources, telecom etc. and administrative, managerial, maintenance, document processing, data entry, reconciliation, training and orientation and other support services to our portfolio companies and to various third parties through our Subsidiary.

We derive income, amongst others, from our 20 portfolio companies and also from provision of support services.

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

We believe that the following factors, amongst others, have significantly affected our results of operations, cash flows and financial condition during the periods under review, and may continue to affect our results of operations and financial condition in the future:

Macro-economic conditions in the sector in which we operate

Our investments are focussed primarily on the automotive sector with 15 of our 20 portfolio companies engaged in the automotive sector. For the nine month period ended December 31, 2020 and Fiscal 2020, 0.44% and 72.86% of our revenue from operations from investments was contributed by portfolio companies engaged in the automotive sector. As we focus on investments in the automotive sector, developments in the automotive and transportation industry have, and will likely continue in the future to have, a disproportionate impact on our investments. As per ICRA, the COVID-19 induced country-wide lockdown, caused factories to close and dealerships to shut, leading to complete loss of sales for the OEMs in April 2020 – a first in the history for the industry. While the operations of OEMs resumed in May-2020, the unabated rise in Covid-19 infections in the unlock phase have resulted in localized re-imposition of lockdowns in several states. This again impacted the domestic supply chains and interrupted the pace of overall economic recovery. *(Source: ICRA Report)*

Our business is, therefore, entirely dependent on various factors that impact this sector such as the demand for automobiles or transportation services in India, changes in Indian regulations and policies affecting vehicles, natural disasters and calamities as well as the Indian and global macroeconomic environment. For example, according to ICRA, the scrappage policy has the potential to drive some replacement demand in the commercial vehicle sector when implemented. However, the extent of such benefit would remain dependent on the form and quantum of incentives offered under the scheme *(Source: ICRA Report)*. Such factors may result in a decline in the sales or value of certain kinds of vehicles, which in turn may adversely affect the financial condition, the results of operations and/or cash flows of our portfolio companies. The enforcement of such scrappage policy may result in a decline in the sale of the products by our portfolio companies which would further, impair our investment and require us to write down our investments or may impact our ability to receive dividend income from our portfolio companies.

Our business, to a large extent, depends on the continued growth in the automobile and transportation industry in India, which is influenced by a number of extraneous factors which are beyond our control, inter-alia including (a) the macroeconomic environment in India, (b) the demand for transportation services, (c) natural disasters and calamities, and (d) changes in regulations and policies in connection with motor vehicles as well as the automotive industry.

Our investments are not diversified and any factor which adversely impacts the automotive and transportation industry may have a disproportionate impact on our operations, profitability and/or cash flows.

Revenue from our portfolio companies

We depend on a limited number of portfolio companies for a significant portion of our revenues. Our top 5 portfolio companies represented 71.12% and 58.63% of our revenue from operations from investments and 24.38% and 22.31% of our total revenue from operations for Fiscal 2020 and Fiscal 2019, respectively.

It is difficult to forecast the success or sustainability of any strategies undertaken by any of our key portfolio companies in response to the current economic or industry environment. Unfavourable industry conditions can also result in an

increase in commercial disputes and other risks of supply disruption. A sustained decline in the demand for products produced by our portfolio companies could prompt them to cut their production volumes, directly affecting the demand from customers for their products. In addition to decline in demand for existing products, insufficient demand for new products launched by our portfolio companies may also affect demand for their products from customers. Further, the volume and timing of sales to end customers may vary due to variation in demand for our portfolio companies' products, their attempts to manage their inventory, design changes, changes in their product mix, manufacturing strategy and growth strategy, and macroeconomic factors affecting the economy in general, and our portfolio companies in particular.

Our growth depends on the growth of our portfolio companies. If our key portfolio companies do not successfully enter into new high-growth segments, we may be prevented from capitalising on new growth opportunities. Since we are significantly dependent on certain key portfolio companies for a significant portion of our revenues, the loss of any one of our key portfolio companies or any adverse change in the financial condition of any of these portfolio companies, could have an adverse effect on our business, results of operations and financial condition. We may continue to remain dependent upon our key portfolio companies for a substantial portion of our revenues.

Government Regulations and Policies

We are subject to the corporate, taxation and other laws in effect in India. The regulatory and legal framework governing us may continue to change as India's economy and commercial and financial markets evolve. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency in India's non-banking finance sector.

The laws and regulations governing the banking and financial services industry in India have become increasingly complex and cover a wide variety of issues, such as interest rates, liquidity, securitisation, investments, money laundering and privacy. In some cases, there are overlapping regulations and enforcement authorities. Moreover, these laws and regulations can be amended, supplemented or changed at any time such that we may be required to restructure our activities and incur additional expenses to comply with such laws and regulations, which could materially and adversely affect our business and our financial performance.

Compliance with many of the regulations applicable to our operations in India, including any restrictions on investments and other activities currently being carried out by our Company, involves a number of risks, particularly in areas where applicable regulations may be subject to varying interpretations. Further, compliance with many of the regulations applicable to our operations may involve significant costs and otherwise may impose restrictions on our operations. There can be no assurance that the laws governing our Company and its operations will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not adversely affect our business and future financial performance.

Additionally, we are required to make various filings with Registrar of Companies and other relevant regulatory or statutory authorities pursuant to the provisions of the Companies Act and other regulations. In addition, we are also required to comply with the directives, regulations and guidelines issued by other regulators for listed companies, including stock exchanges and SEBI. If we fail to comply with these requirements, or a regulator claims we have not complied with these requirements, we may be subject to penalties and compounding proceedings. Imposition of any penalty or adverse findings by such authorities may have an adverse effect on our business, operations results, financial condition and reputation.

Our Investments, divestitures and other significant transactions

As part of our business strategy, we may acquire or invest in companies or businesses, enter into strategic alliances and joint ventures, divest non-core businesses or assets, sell or dispose of any unit(s) or division(s), and make investments/disinvestments to further our business or any other restructuring. In order to pursue this strategy successfully, we must identify suitable entities for successfully completing such transactions, some of which may be large and complex, and manage the integration of acquired companies or employees. We may not fully realise all of

the anticipated benefits of any such transaction within the anticipated timeframe or at all. Any increased or unexpected costs, unanticipated delays or failure to achieve contractual obligations could make such transactions less profitable or unprofitable. Managing business combination(s) and investment transactions requires varying levels of management resources, which may divert our attention from other business operations, and may result in significant costs and expenses and charges to earnings. The challenges involved in integration include:

- combining product offerings for different portfolio companies and entering into new markets in which we are not experienced;
- consolidating and maintaining relationships with customers of such portfolio companies;
- consolidating and rationalising transaction processes and corporate and information technology infrastructure;
- integrating employees and managing employee issues;
- coordinating and combining administrative and other operations and relationships with third parties in accordance with applicable laws and other obligations while maintaining adequate standards, controls and procedures;
- achieving savings from infrastructure integration; and
- managing other business, infrastructure and operational integration issues.

Accordingly, a failure to identify, manage, complete and integrate acquisitions, divestitures and other significant transactions successfully could adversely affect our results of operations, business prospects and/or cash flows.

Impact of COVID-19

Due to the emergence of the coronavirus disease 2019 (“COVID-19”), declared a pandemic by the World Health Organization, the Government of India had introduced stringent measures to prevent the spread of the disease. As on the date hereof, certain restrictions imposed by the GoI, such as on maintenance of social distancing, have not been completely lifted. As the viral pandemic has not yet fully subsided, there is little comprehension on the full impact of the pandemic induced lockdown on the Indian or the global economy. While the GoI has, through the Ministry of Finance, issued a series of liquidity enhancement measures to counteract the slowdown caused by a reduction in economic activity during the lockdown, the impact of such measures remains unknown at the present moment.

Some of the ascertainable impact of COVID-19 pandemic and the pandemic induced lockdown on the business and operations of our portfolio companies and consequently on our prospects, include:

- Adverse impact on the business of our portfolio companies and their customers, which in turn has adversely impacted our business prospects;
- Adverse liquidity on account of an RBI mandated moratorium, which in turn will also lead to decrease in overall auto sales and repayments; and
- Reduction of employee headcount or employee costs and other cost optimization measures.

While our Company was operational during the lockdown in accordance with the guidelines issued by the Ministry of Home Affairs and the concerned State Government, from time to time, there can be no assurance that even with easing of the pandemic containment measures, economic activity in general or the level of business enjoyed by our Company or our portfolio companies in the past will continue to exist.

The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will significantly depend on future developments, including the timeliness and effectiveness of actions taken or not taken to contain and mitigate the effects of COVID-19 both in India and internationally by governments, central banks, healthcare providers, health system participants, other businesses and individuals, which are highly uncertain and cannot be predicted.

Additionally, as we gradually transition towards pre-pandemic levels of office attendance for our employees, sanitisation and precautionary measures undertaken may cause our Company to incur additional expenses to maintain the health of employees, including operating with limited staff or at limited times, which in turn will impact our business and results of operations. Further, if any of our employees contract COVID-19 and are unable to continue

working, we may be compelled to undertake additional measures including temporary suspension of operations at a particular office, which in turn will impact our business and results of operations.

The negative impacts of the COVID-19 pandemic is expected to be reflected in the turnover and profitability of our Company for the Fiscal 2021. Our revenue from operations decreased by 28.13% from ₹ 5,702.65 lakhs in the nine month period ended December 31, 2019 to ₹ 4,098.34 lakhs in the nine month period ended December 31, 2020, which was primarily on account of reduction in dividend income from portfolio companies.

Due to the limited information available currently, we have not been able to quantify the full impact of the containment measures on our financial statements. In the event that the containment measures have a significant adverse impact on the economic health of our customers in particular and the economy in general, our future prospects, profitability and results of operations may in turn be negatively impacted.

For details of certain other risks which may adversely impact our results, see “*Risk Factors*” beginning on page 18.

Significant accounting policies

Basis of Preparation

The Consolidated financial statements of the group comply in all material aspects with the Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) Companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

The Financial Statements have been prepared on a historical cost basis, except for certain financial instruments that are measured at fair values at the end of each reporting period.

Consolidated financial statements are prepared in Indian Rupees (Rs.), which is also its functional currency.

Principles of Consolidation: The consolidated Financial statements comprise the financial statements of the parent company and its subsidiary which is controlled by the parent company.

Subsidiaries: Subsidiaries are all entities over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The group combines the financial statements of the parent and its subsidiary line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset.

Goodwill represents the difference between our Company’s share in the net worth of subsidiary and its cost of acquisition.

The financial Statements of the following subsidiary company is consolidated as per Ind AS 110- Consolidated Financial Statements.

Name of the Subsidiary	Country of Incorporation	Proportion of Ownership Interest (%)
Sundaram Business Services Limited	India	100

Associates:

Associates are all entities over which the group has significant influence but not control or joint control. (This is generally the case where the group holds between 20% and 50% of the voting rights). Investments in associates are accounted for using the equity method of accounting after initially being recognized at cost.

Name of the Associates	Country of Incorporation	Proportion of Ownership Interest (%)
Axles India Limited	India	38.81
Turbo Energy Private Limited	India	32.00
Wheels India Limited	India	23.28
Transenergy Limited	India	43.74
Sundaram Dynacast Private Limited	India	26.00
Sundaram Hydraulics Limited	India	25.71
Flometallic India Private Limited	India	40.00
Dunes Oman LLC (FZC)	Sultanate of Oman	43.69
Mind s.r.l Italy	Italy	40.60

Under the equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognize the group's share of the post-acquisition profits or losses of the investee in profit and loss, and the group's share of other comprehensive income of the investee in other comprehensive income. Dividends received from associates are recognized as a reduction in the carrying amount of the investment.

Unrealised gains on transactions between the group and its associates are eliminated to the extent of the group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

When the Group's share of losses in an equity accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the group does not recognise further losses, unless it has incurred obligation or made payments on behalf of the other entity

Measurement of fair values

The Group's accounting policies and disclosures require the measurement of financial assets and liabilities at fair values. The Group has established policies and procedures with respect to measurement of fair values.

The Group's policy on Fair Valuation is stated below.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole;

Level 1 - The fair value of financial instruments traded in active markets (such as publicly traded securities) is based on quoted (unadjusted) market prices at the end of the reporting period. The quoted market price used for financial assets held by the Group is the current bid price.

Level 2 - The fair valuation of instruments not traded in active markets is determined using valuation techniques. These valuation techniques maximize the use of observable market data and minimize the use of entity specific estimates (All significant inputs to the fair value measurement is observable)

Level 3 –Valuation techniques for one or more significant inputs to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Revenue Recognition:

Revenue is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group is entitled in exchange for those goods or services, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment.

Revenue from rendering of services is recognised with reference to the stage of completion determined based on estimate of work performed, and when the outcome of the transaction can be estimated reliably.

Dividends:

Dividend income is recognised when the Group's right to receive the payment is established, it is probable that the economic benefits associated with the dividend will flow to the entity and the amount of dividend can be measured reliably. This is generally when the shareholder approve the dividend.

Interest Income:

For all debt instruments measured at amortised cost, interest income is recognised on time proportion basis, taking into account the amount outstanding and effective interest rate.

Rental Income:

Rental income arising from operating leases is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit and loss due to its operating nature.

Financial Assets

Classification

The Group classifies its financial assets in the following categories:

- Those to be measured subsequently at fair value (either through comprehensive income or through statement of profit and loss), and
- Those measured at amortised cost

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flow.

Initial Measurement

At initial recognition, the group measures a financial asset at its fair value plus (in the case of financial asset not a fair value through profit or loss) transaction cost that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the statement of profit and loss.

Subsequent Measurement

Financial Asset measured at Amortised Cost ("AC")

A financial asset is measured at amortised cost if it is held within a Group's business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate ("EIR") method.

Financial assets at fair value through other comprehensive income: ("FVTOCI")

Financial assets are subsequently measured at fair value through other comprehensive income if these financial assets are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on principal and the interest on the principal outstanding.

Financial assets at Fair value through profit or loss: ("FVTPL")

Any financial asset not subsequently measured at amortized cost or at fair value through other comprehensive income, is subsequently measured at fair value through profit or loss. Financial assets falling in this category are measured at fair value and all changes are recognized in the Statement of Profit and Loss.

Financial Liabilities

Initial Recognition

All financial liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition.

Subsequent Measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

De-Recognition

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset.

A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

Impairment of Financial Assets

The Group applies the Expected Credit Loss ("ECL") model for recognizing impairment losses if any on financial assets.

12 months ECL represents the expected default events on the financial asset that are possible within 12 months after the reporting date.

Where the credit risk on the financial assets has not increased significantly since initial recognition, the loss is measured at an amount equal to 12 months ECL.

Where the credit risk on the financial assets has increased significantly since initial recognition, the loss is measured at an amount equal to the lifetime expected credit loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet when the Group has a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

Derivative financial instruments

The Group is exposed to certain risk relating to its ongoing business operations. The primary risks managed using derivative instruments are foreign currency risk.

To mitigate the risk of changes in foreign exchange rates on forecasted cash flows denominated in foreign currencies, the Group holds derivative financial instruments such as foreign exchange forward contracts. The counterparty for these contracts is generally a bank.

Derivatives are recognized and measured at fair value. Attributable transaction costs are recognized in the Statement of Profit and Loss.

Cash flow hedges: Changes in the fair value of the derivative hedging instrument designated as a cash flow hedge are recognized in other comprehensive income and presented within equity in the cash flow hedging reserve to the extent that the hedge is effective.

To the extent that the hedge is ineffective, changes in fair value are recognized in the statement of profit and loss.

Leases

The Group's lease asset classes primarily consist of leases for land and buildings. The Group assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether: (i) the contract involves the use of an identified asset (ii) the Group has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Group has the right to direct the use of the asset.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. Right of use assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Group changes its assessment of whether it will exercise an extension or a termination option.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

Employee Benefits

Short Term Employee Benefits

As per the employment policy of the Group, short term employee benefits for services rendered by employees are recognized during the period when the services are rendered.

Post Employment Benefits

a. Defined Contribution plans

i. Superannuation

The Group contributes to the Superannuation fund, which is managed by the Life Insurance Corporation of India (LIC). The contributions are charged to the Statement of Profit and Loss.

ii. Provident Fund

The Provident Fund contributions are made to the government administered Provident Fund and Employees' Pension Scheme under the Employees Provident Fund Act and to Employees' State Insurance Schemes on behalf of its employees. The contributions are charged to Statement of Profit and Loss.

b. Defined benefit plans

i. Gratuity

The Group provides a lump sum payment to eligible employees, at retirement or resignation of employment based on the last drawn salary and years of employment with the Group as per the provisions of the Payment of Gratuity Act, 1972. The Group makes contributions to a gratuity fund administered by trustees and managed by LIC of India.

The liability or asset recognized in the Balance Sheet in respect of a defined gratuity plan is the present value of defined benefit obligation at the end of the reporting period less the fair value of plan assets. Gratuity liability is a defined benefit obligation and is recorded based on actuarial valuation using the projected unit credit method made at the end of the year.

The present value of defined benefit obligation is determined by discounting the estimated future cash out flows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The gratuity liability and net periodic gratuity cost is actuarially determined after considering discount rates, expected long term return on plan assets and increase in compensation levels. Re-measurement gains or losses arising from Experience Adjustments and changes in actuarial assumptions are recognized in the period they occur, directly in the Other Comprehensive Income. They are included in the statement of changes in equity and in the Balance Sheet. Re-measurements comprising actuarial gains or losses and return on plan assets (excluding amounts included in net interest on the net defined benefit liability) are not reclassified to Statement of Profit or Loss in subsequent periods.

Changes in present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in the Statement of Profit and Loss.

c. Other Long Term Employee Benefits

- i) The estimated liability in respect of other long term benefits like Employee Assured Bonus Scheme has been provided on the basis of actuarial valuation.
- ii) Leave Encashment:

The Group contributes to a staff leave encashment scheme managed by SBI Life Insurance Company Limited. The Group accounts its liability based on an actuarial valuation, as at the Balance Sheet date, using the Projected Unit Credit method.

Income Taxes

Income-tax expense comprises current tax (amount of tax for the period determined in accordance with The Income Tax law) and deferred tax charge or credit (reflecting the tax effects of temporary differences between tax bases of assets and liabilities and their carrying amounts in the financial statements). Taxes are recognized in the Statement of Profit and Loss except to the extent it relates to items directly recognized in equity or in the Other Comprehensive Income.

Current tax

Current tax is measured at the amount expected to be paid in respect of taxable income for the year in accordance with the Income Tax Act, 1961. Current tax comprises the tax payable on the taxable income or loss for the year and any adjustment to the tax payable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Group:

- a) has a legally enforceable right to set off the recognized amounts; and
- b) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable income.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilized.

Deferred tax assets are reviewed at each reporting date and based on management's judgement, are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Unrecognized deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax assets and liabilities are offset only if the Group:

- a) has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

Current and Deferred tax for the year- OCI

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Property, plant and equipment

The property plant and equipment are the assets held for the use in the supply of services.

Property, plant and equipment's are stated in the balance sheet at cost (net of duty/ tax credit availed) less accumulated depreciation and accumulated impairment losses.

Cost of acquisition is inclusive of freight, non-refundable duties & taxes and other directly attributable cost of bringing the asset to its working condition for the intended use.

Freehold land is not depreciated.

An item is recognised as property plant and equipment if and only if it is probable that future economic benefits associated with the item will flow to the Group and its costs can be measured reliably.

Subsequent expenditure is added to the carrying amount or recognised as separate asset only when it is probable that future economic benefits associated with the item will flow to the Group and the cost can be measured reliably.

Depreciation commences when the assets are ready for their intended use. Where the property plant and equipment is not ready for its intended use as on the balance sheet date it is disclosed as capital work in progress

For the Parent and its subsidiary, Depreciation is recognised to write off, the cost of assets less their residual values over their useful lives, using the written down value method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

All the Associate companies except Turbo Energy Private Limited provide depreciation on Property, Plant & Equipment on straight-line basis on the useful life of the asset as provided in the schedule II of Companies Act 2013

Estimated useful lives of the assets, based on technical assessment, which are different in certain cases from those prescribed in Schedule II to the Act, are as follows:

	(in years)
Assets	Own
Office equipment	8
Computer (included in Plant & Equipment)	
End user services	7
Servers and network	10
Vehicles	5
Electrical Equipment	15

The property plant and equipment with definite life are reviewed for impairment whenever the events or changes indicate that their carrying value may not be recoverable.

Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life.

An item of the property plant equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of the item of property plant equipment is determined as the difference between the sale proceeds and carrying amount of the asset and is recognised in profit and loss.

Investment Property

Properties held to earn rental income or for capital appreciation or both and that is not occupied by the Group is classified as Investment Property.

It is measured initially at cost of acquisition including transaction costs, borrowing cost and other directly attributable cost in bringing the asset to its working condition for its intended use.

Subsequent expenditure is capitalized to the asset carrying amount only when it is probable that the future economic benefit associated with the expenditure will flow to the Group and cost can be measured reliably.

The fair value of investment property has been determined by property valuer, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued.

Depreciation is provided on written down value method by adopting useful life prescribed under schedule II to the Companies Act, 2013 after retaining 5% of Original cost as residual value for Buildings.

Items of Investment property	Useful Lives(Total)
Freehold Land	N.A
Building	30 years

Though the Group measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the statement of profit and loss in the period of derecognition.

Intangible assets

Intangible assets are identified non-monetary assets without physical existence. Intangible assets represent Computer software whose cost is amortised over their expected useful life on a straight-line basis.

Intangible assets with finite useful lives that are acquired separately are capitalised and carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over the estimated useful life of the asset.

Intangible assets are recognised in books only when it is probable that future economic benefits associated with the asset will flow to the group and the cost can be measured reliably.

The cost of the intangible asset shall include the purchase price, including non-refundable duties and taxes, all the directly attributable costs to bring the intangible to the present location, working condition and intended use.

Impairment of Assets

The carrying amounts of assets are reviewed at each balance sheet date to ascertain impairment based on internal / external factors. An impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of the net selling price of the assets and their value in use.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

Foreign Currency Transactions

Functional and Presentation Currency:

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the entity operates (i.e the “functional currency”). The functional currency of Group is the Indian Rupee. These Consolidated financial statements are presented in Indian rupee.

Foreign Currency Transactions and balances:

Transactions in foreign currency are accounted at the exchange rates prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets, are capitalized as cost of assets.

Non-monetary items that are measured in terms of historical cost in a foreign currency are recorded using the exchange rates at the date of the transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or Statement of Profit and Loss are also recognised in OCI or Statement of Profit and Loss, respectively).

Cash Flow Statement

Statement of cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Group are segregated.

Provisions and Contingent Liabilities

Provisions are recognized when the enterprise has a present legal or constructive obligation, as a result of a past event, and it is probable that the Group will be required to settle the obligation for which a reliable estimate can be made.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

A Contingent liability is

- (i) a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group (or)

- (ii) a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation, or a reliable estimate of the amount cannot be made.

A contingent liability should be disclosed, if the possibility of an outflow of resources embodying economic benefits is not remote.

Earnings Per Share

The basic earnings per share has been computed by dividing the net income attributable to equity shareholders by weighted average number of equity shares outstanding during the year.

The diluted earnings per share has been computed using weighted average number of shares adjusted for effects of all potentially dilutive equity shares.

Cash and Cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily Convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Critical accounting judgments and key sources of estimation uncertainty

The preparation of consolidated financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the balance sheet and statement of profit and loss. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. The actual results may differ from these estimates. The management believes that the estimates used in preparation of the consolidated financial statements are prudent and reasonable. Any revision to the accounting estimates is recognised prospectively in the current and future periods.

Useful lives of Property Plant and Equipment / Intangible Assets

Property, Plant and Equipment / Intangible Assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Group's historical experience with similar assets and takes into account anticipated technological changes. The depreciation / amortisation for future periods is revised if there are significant changes from previous estimates.

Impairment of Financial Assets

The impairment provisions for Financial Assets are based on assumptions about risk of default and expected cash loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

QUANTITATIVE AND QUALITATIVE DISCLOSURES

The Company along with its Subsidiary (“**Group**”) has exposure to the following risks arising from financial instruments: Credit risk; Liquidity risk; and Market risk.

The Group’s risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group’s activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

(a) Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group’s approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group’s reputation.

The Group regularly monitors the rolling forecasts and the actual cash flows to service the financial liabilities on a day-to-day basis through cash generation from business and by having adequate banking facilities.

(b) Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group’s receivables from customers and loans and advances.

i. Trade receivables:

The Group’s exposure to credit risk is influenced mainly by the individual characteristics of each customer and the geography in which it operates. Concentration of credit risk with respect to trade receivables are limited as the customers are reviewed, assessed and monitored regularly on a monthly basis with pre-determined credit limits assessed based on their payment capacity. Our historical experience of collecting receivables demonstrates that credit risk is low.

ii. Other financial assets:

The Group has exposure in Cash and cash equivalents, employee loans and investment carried at amortised cost. The Group’s maximum exposure to credit risk as at March 31, 2020 is the carrying value of each class of financial assets as on that date.

(c) Market Risk

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices in case of equity investments and Net Asset Value (NAV) in case of mutual fund investments and currency risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Group is having certain investments in unlisted companies in automobile sector where the valuation takes place based on certain market multiples of similar listed automobile companies after duly adjusted for discounts to the same.

The Group is exposed to foreign exchange currency risk on account of having sales revenue in foreign currency.

The Group has a forex policy in place whose objective is to reduce foreign exchange risk by deploying the appropriate hedging strategies (forward contracts) and also by maintaining reasonable open exposures within approved parameters depending on the future outlook on currencies.

Auditor’s Qualification

Other than as disclosed below, there have been no reservations/ qualifications/ adverse remarks/ matters of emphasis highlighted by our statutory auditors in their auditor’s reports on the Financial Statements:

Audited Consolidated Financial Statements for the Financial Year 2020

Emphasis of Matter

We draw your attention to Note 32h of the consolidated financial statements wherein the Holding Company has disclosed impact assessment due to COVID-19 pandemic. As stated in the said note, the impact assessment carried out by the Management with available information did not indicate any material impact on the carrying value of assets and liabilities of the Group as on the reporting date or any adverse impact on ability of the Group to continue as a going concern. Considering the uncertainties prevailing in the economic conditions globally and in India, such impact assessment done by the Management is highly dependent on the circumstances as they evolve in subsequent periods. Our opinion is not modified in respect of this matter.

Actions taken by the Company

The outbreak of Coronavirus disease (COVID-19) pandemic globally and in India is causing significant disruption of economic activity. The Group has considered the possible effects that may result from the pandemic on the carrying amount of Investment, receivables and other assets. Based on the internal and external information up to the date of approval of these financial results, the Group expects to recover the carrying amount of these assets and it believes that there is no impact on its ability to continue as a going concern. However, the Group will continue to closely monitor any material changes to future economic conditions.

Unaudited Condensed Consolidated Interim Financial Statements for the nine month period ended December 31, 2020

Auditor’s review report

We draw your attention to Note 27(C) of the Unaudited Condensed Consolidated Interim Financial Statements wherein the Holding Company has disclosed impact assessment due to COVID-19 pandemic. As stated in the said note, the Management has assessed that the pandemic and consequent lockdown imposed by the Government till end

of November 2020 have considerably impacted the business operations of the Holding Company’s Associates, including their subsidiaries, which in turn, have impacted the financial results of the Holding Company, being an investment entity. The management is also of the view that though there have been signs of a reasonably healthy recovery in the automotive sector during the third quarter of the financial year pursuant to the phased release of the lock down, a full recovery to the levels of the pre-COVID era is unlikely in the near future. Considering the uncertainties prevailing in the economic conditions globally and in India, such impact assessment done by the Management of the Holding Company is highly dependent on the circumstances as they evolve in subsequent periods. Our conclusion is not modified in respect of this matter.

Actions taken by the Company

The worldwide disruption caused by the COVID-19 pandemic and the consequent lockdown imposed almost till end-November 2020 have considerably impacted the business operations of our associate companies, including their subsidiaries, which in turn, have impacted the financial results of the Company. Though there have been signs of a reasonably healthy recovery in the automotive sector during the third quarter of the financial year pursuant to the phased release of the lock down, a full recovery to the levels of the pre-COVID era is unlikely in the near future. The company will however continue to closely monitor any material changes to future economic conditions and take appropriate risk mitigation measures.
